

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

BIENNIAL REPORT
—OF THE—
STATE SUPERINTENDENT
—OF—
FREE SCHOOLS
—OF—
WEST VIRGINIA
—FOR THE—
TWO YEARS ENDING JUNE 30, 1898.

J. R. TROTTER,
STATE SUPERINTENDENT OF FREE SCHOOLS.

CHARLESTON:
1899

State of West Virginia,
Department of Free Schools,
Charleston, January 1, 1899.

To His Excellency,
GEORGE W. ATKINSON,
Governor of West Virginia.

SIR:—In compliance with the requirements of section 67 of chapter XLV of the Code, I have the honor to submit herewith the report of the Department of Free Schools for the biennial period ending June 30, 1898.

J. R. TROTTER,
State Superintendent of Free Schools.

REPORT

The statistics herein contained though of little value when set apart by themselves are of almost inestimable value when used in comparison with the statistics of other years. They show that despite many glaring imperfections and exasperating weakness in our educational system, the schools of the State, from the lowest primary grade to the chief educational institution of the State have in recent years made such rapid strides that we may hope to see them soon take their place by the side of the schools of the older and wealthier states.

It is gratifying to learn moreover that the spirit of progress so plainly manifested is not confined to one section or to one class of people, but that with one or two exceptions every county in the State has made substantial improvement and that without any exception every class of people has been enthusiastic in the educational work of the State and has shown commendable pride in the results.

It is moreover more than gratifying to note that not only the masses but also the classes are availing themselves of the advantages of even the most humble rural schools and that many of those who were born and reared in a section where but little attention was paid to free schools, having begun to realize in the last decade that even much lauded private institutions are in many respects inferior to those which are placed at their very door and which are maintained almost without cost.

The liberality of the people in meeting all district demands, which in some sections were exceedingly oppressive, is worthy of the highest commendation. It proves most conclusively that

they are terribly in earnest in this work of building up a stable and substantial government by training the boys and girls to be enlightened, law-abiding, liberty loving citizens.

COST OF SCHOOLS

A careful examination of the various tables appended will show that the amount expended by the State for the maintenance of the public schools has now reached vast proportions, vast at least when compared with the expenditure a decade ago. The total expenditure for the school year ending June 30, 1898 was \$1,960,413.54, an increase of \$45,000 over the previous year, and of more than \$750,000 over the year ending June 30, 1888. This amount for 1898 was made up from the following resources:

General School Fund	\$ 349,982.22
District Levies, etc.,	\$1,610,431.32

and was divided as follows:

Teacher's Fund	\$1,294,483.54
Building Fund	\$ 665,930.00

To this amount must be added the appropriations made to the various educational institutions as follows:

The West Virginia University	\$ 36,550.00
The State Normal Schools, including tuition for colored students	\$ 47,304.50
The Preparatory Branch of the University.....	\$ 6,225.00
The West Virginia Colored Institute	\$ 15,000.00
Storer College	\$ 1,000.00
The Bluefield Colored Institute	\$ 4,425.00
School for the Deaf, Dumb and Blind.....	\$ 34,850.00
Pay of Institute Instructors	\$ 1,000.00

The total of the various items \$2,106,768.04, is the amount expended by the State for primary, secondary, and higher education.

The cost of education per capita of enumerated pupils in 1888 was \$4.41. In 1898 this has risen to \$6.48, an increase of more than 47 per cent. due for the most part to an increase in teacher's salaries and to an increase in the cost of buildings. In 1888, according to the report issued that year, the average price paid teachers was, for number one certificates, \$33.00; for number

two, \$25.56; and for number three, \$20.25. Ten years later these amounts have changed to \$31.33, \$24.79, and \$20.90, respectively. This would indicate a large decrease, but the difference is due to a mistake in calculation. And as a matter of fact there is an increase of perhaps 6 per cent. in the ten years.

In 1888 the total value of school buildings and grounds was \$1,865,301.00, and in 1898, \$3,065,848.25, an increase of over 64 per cent.

ATTENDANCE

For the school year ending June 30, 1898, the total enumeration was 302,354, an increase of 1,825 over the previous year, and of 45,994 over 1888. Of the number enumerated only 158,527 or 52.4 per cent. were in actual daily attendance, while in the previous year and in 1888, the per cent. was only 44.3 and 47.6 respectively. The large per cent. of attendance in 1898 over the other years cited is due almost entirely to the compulsory attendance law, passed in 1897, which requires all children between the ages of 8 and 14 to attend school at least sixteen weeks each year. In one county, in particular, the increase of attendance over the previous year was estimated by the county superintendent to be at least 40 per cent.

TEACHERS

The whole number of teachers employed during the year was 6,808, an increase of 156 over the preceding year, and of 1,570 in ten years. Of these 4,096, or 60.2 per cent. were men, and 2,712 or 39.8 per cent. were women. In 1888, 64.5 per cent. were men and 35.5 per cent. women. The entire enrollment for the year was 236,935. The average number of pupils for each teacher was, therefore, 34.8.

As the average length of term for 1898 was 5 13-20 months and the average salary \$29.21 per month the approximately average yearly salary for males and females was \$165.09, a sum utterly inadequate for provision for the infirmities of old age. It is little wonder therefore that only a very small per cent. of teachers remain in the profession more than ten years and that those who have remained so long are eager for a system of pensions for aged or infirm teachers. Still it is altogether probable that,

on an average, teachers are well paid for the services they render. In all communities there are some teachers who earn vastly more than they receive but there are also many teachers who would be dear if they were employed without money and without price, and the worst of it is that this condition can never be entirely changed and certainly cannot be even bettered as long as the qualifications of teachers are tested as they are at present.

•

TEACHERS' EXAMINATIONS

Within the last two years more attention has been paid to the subject of rural schools than during any ten years previous. Plans almost without number for bettering their condition have been proposed but so far as our own State, with conditions peculiar to itself, is concerned, none of the other suggestions proposed for the increased efficiency of the country school can be compared with the suggestions on the subject of better preparation of teachers. In fact, could we have properly qualified teachers and effective supervision, the rural school problem would require no solution. But under the present law for examining and certifying teachers the question of qualification is frequently of minor importance. The attention of this department has been called to many cases, particularly in one locality, of violation of law on the part of the members of the boards of examiners who in consideration of "love and affection" or sometimes of a ten dollar bill have violated their oath and prostituted their office by giving out questions previous to the examination, by giving assistance in examinations, by raising certificates, and by issuing certificates to certain persons who had not gone through even the merest sham of an examination. In one county where there are sometimes not enough teachers for all the schools, the board of examiners is accustomed to issue certificates promiscuously without any examination so that there might be an adequate supply of teachers. In other counties of the State it is a well known fact, not a mere theory, that no teacher can secure a high grade certificate unless he has attended the "Summer Termal School" taught by the county superintendent and even if he cannot secure it unless he has attended practically the en-

ture term. Thus it will be seen that "love and affection," ten dollar bills, and attendance at the superintendent's school rather than scholarship and the ability to teach, are sometimes the *sine qua nons*.

Moreover by our peculiar system of county examinations a certificate, even though it may have been fairly and honestly secured is but an indication of the qualifications of its holder in comparison with the qualifications of the other teachers of that county and of no other. That is to say, the standards of examinations are so variable in the different counties that a number three certificate granted in some counties, represents as high rank in scholarship as a number one in other counties. In fact, some boards of examiners have taken upon themselves to abolish entirely the third grade certificate and have issued only number ones and number twos in the proportion of ten of the former to one of the latter. This should indicate very efficient teachers and a very advanced condition of school affairs but it generally indicates the opposite. The result of this iniquitous practice of giving all applicants high grade certificates without reference to qualifications is readily seen on the price paid teachers. In this as well as in other affairs of life there is felt a compensating influence. For instance, in a school district a certain amount will be paid for all the teachers. If almost all are third grade teachers they will receive high salaries for that grade, but if the examinations are made less rigid so that all those who had third grade certificates now receive first grade the same fixed amount will still be divided and they will still receive practically the same salary, which, in this instance, would be low for that grade. That is, if all get number three certificates they will receive the same salary that they would receive if they all had number ones. Consequently so far as salary is concerned it matters little to inferior teachers whether the majority hold number one or number three certificates. But to the better teachers, those who could secure a first grade certificate in any reasonable examination it makes a vast difference, for when all receive first grade certificates the better teacher will receive the same salary as the ignoramus for they all have the same grade certificate and salary is determined by the grade of the certificate. But if the very few really proficient teachers, in recognition of their superior qualifications, were granted, for instance, certificates designated as

Al they would receive a higher salary than those holding the number one certificates and the latter would not suffer any noticeable decrease. In other words the fewer number ones the better for those who can reach that standard and the greater incentive for those of lower grade to rise above their present condition.

But again, if the examinations were made rigid and if, as a result, the majority of the teachers were given low grade certificates and the very few, worthy, well qualified, were given a high grade certificate and a good salary, many teachers would have ambition enough to prepare themselves so that they too would receive high grade certificates. The immediate and direct result of this would be that although the majority of the teachers would in time have the highest certificate, they would have the scholarship that a certificate of that grade should represent and the boards of education realizing that they were now getting an adequate return for their money would not lower the salary. But under the conditions that obtain in some counties there is absolutely no incentive to better preparation because all the poor teachers and those thoroughly qualified will receive the same wages and that will always be low wages.

It is wrong, however, to think that this desirable change can be accomplished, or that a small revolution of the entire school system can be brought about by making the examinations more technical or by using mere "catch" questions. The greatest demand is that the young men and young women who are to train the future citizens of the State in ways of honor and integrity shall, for their own good and for the good of the immortal souls to be placed under their direction, be compelled to be honest in the county examination. It is unfortunate that a great many applicants for certificates think it is not wrong to cheat on examination and that in many counties the boards of examiners accept such conduct as a matter of course and even go so far as to countenance it by assisting certain favorites.

As a matter of fact the developments of the last year show that in some sections of the State the examinations have been conducted so loosely and so dishonestly, and as a direct consequence such utterly incompetent teachers have foisted themselves upon the public that the interest in public education which was awake seems now almost in a state of apathy.

The experience of other states has been that the only feasible remedy for this condition of affairs lies in a state board of examiners who would prepare questions, grade manuscripts, and issue certificates, good in any county in the State. The importance of this subject is so great and the necessity of prompt action is so imperative that it has seemed advisable to give at some length, in another part of this report, a moderately full discussion of the subject of uniform examinations, together with pertinent extracts from the laws and comments from the reports of State Superintendents upon the workings of the system..

SCHOOL SUPERVISION

Theoretically we have county supervision of schools. Practically we have none. The law as it now stands makes it impossible. Under the provisions of the law the county superintendent has charge of the educational interests of his county but his power is so limited that he can speak as one with authority only with reference to changing sub-districts lines, selling old school houses, adopting plans for new buildings and locating, in certain cases, new houses. His duties as laid down in the laws of the State are, to say the least, numerous and irksome. He is required, for instance, to visit at least once each year, all the schools in the county. To do this in the larger counties he must visit on an average two schools a day, and, as the distance between schools is often considerable, two visits a day means from one to two hours at most in each school. And even this perfunctory duty is generally done without order or without system. Instead of observing carefully the work done, this so called supervising officer generally inflicts a cut and dried speech upon the patient children and then proceeds to his next appointment happy in the consciousness of a duty well done but none the wiser as to the qualifications of the teacher he has just visited.

Others not so enterprising or so conscientious, forgetful that they have sworn to perform the duties of their office, do not even go through the formality of visiting schools, but devote their time to teaching or in some cases to the practice of law because their salary does not justify them in devoting the whole winter to the duties of their office, a fact which they evidently did not consider when they were candidates for the places.

But if every superintendent should visit every school in his

county what practical advantage would there be to the teacher or to the school as long as under the law the county superintendent would be exceeding his authority did he but make the simplest suggestion to the teacher in charge?

The failure in our present system of supervision cannot be charged up to the law alone or to the superintendent alone but rather to both. The time has certainly come when the school interests demand professional supervision, but even professional supervision will amount to naught unless the supervisor is given by law entire freedom in the discharge of his duties. Unless like a city superintendent he is empowered to direct in the minutest manner the work of the teacher and unless like that official he has a voice, with no uncertain sound in the selection and location of the teachers of the county. "The county superintendent should be a trained school man, and a matter of justice demands that he shall be a person possessing some fixed qualifications for the performance of the duties of his office" rather than that he shall be a political favorite possessing only the abilities of the ward politician.

But even the best superintendent obtainable can do little when required to supervise from two hundred to two hundred and fifty schools. We possibly cannot hope to divide up the State so that each superintendent will have, as in North Dakota, from one to fifty schools under his control and shall receive for his work one hundred dollars a year in the one case and nine hundred in the other. But unless we make some move in that direction, that is, unless we make county supervision more effective, there are many school men who have no hesitancy in saying the office should be abolished.

Whether that is true or not, there is none to deny that the salary and the authority of the county superintendent should be increased, that severer penalties for failure to discharge his duties should be provided, and that he should be absolutely prohibited from teaching either a public school or a private normal school at least so long as he, as a member of the board of examiners, has such abundant opportunity to reward his friends and patrons.

The West Virginia Educational Association at its annual meeting, held in Charleston in 1896, adopted the following resolution:

"Resolved, That the County Superintendency should be made more efficient through wider power, higher qualifications, and

better compensation; and that the chair appoint a committee of three to present this resolution, with memorial, to the next Legislature.

That the law should prohibit County Superintendents from teaching either public or private schools, and examiners from teaching subscription or select schools, while in office."

HIGH SCHOOLS

Although West Virginia is credited with twenty-four or twenty-five high schools, she must, for the present, content herself with the reputation of being one of the very few states without a first class high school, first class with reference to the amount, and not with reference to the quality of the work done. In former years this was not so noticeable, but since the admission requirements of the West Virginia University have been made equal to those of other colleges and universities, and the boys and girls of the State cannot prepare for entrance to that institution at a public school except at one of the normal schools or at the Preparatory Department of the University, this want of proper secondary school advantages has become much more apparent.

Plans almost without number for establishing county and district high schools have been discussed, and many of them warmly advocated, but as yet nothing definite has been accomplished and it is doubtful whether anything will be done for some years. But something may be done and should be done to enrich, to systematize, and to unify the courses of study in the high schools now established. To this end the State Educational Association at the annual meeting held in Charleston in eighteen hundred and ninety-six, took action as follows:

Whereas, There is need of unifying the educational forces of the State so as to bring about harmony between the courses of study of the Common Schools, the Graded Schools, the High Schools, the Normal Schools and admission to the Academic Courses of the University; therefore, we recommend the adoption of the following:

1. A uniform course of instruction for the first two years of all High Schools throughout the State, which course may be amplified and extended at the pleasure of the several Boards of Education of said High Schools.

2. That the State Superintendent of Free Schools shall have direct supervision of the Graded Schools and the High Schools, and be made ex-officio, a member of the Board of Regents of the State University.

A committee of five was appointed to draft a bill to carry out these provisions and secure the passage of the bill by the next Legislature.

The committee met in Charleston in January, 1897, and presented to the Legislature the following bill and memorial:

Be it enacted by the Legislature of West Virginia:

That chapter forty-five of the Code of West Virginia be amended by adding the following section thereto as section twenty-six (a).

Sec. 25 (a). The following course of study shall constitute the course of study for the high schools of the State. Provided, however, that the said course for the third and fourth years may be amplified and extended at the pleasure of the several boards of education, or other high school authorities.

FIRST YEAR.

LATIN—First Lessons in Latin.

ENGLISH—Grammar; Composition.

MATHEMATICS—Arithmetic; Bookkeeping.

HISTORY—American History; Civil Government.

SCIENCE—Physical Geography.

REQUIRED READINGS—"Tom Brown at Rugby"—Arnold; "Evangeline"—Longfellow; "The Story of the Greeks"—H. A. Guerber; "The Story of the Romans"—H. A. Guerber; "Franklin's Autobiography."

SECOND YEAR.

LATIN—Grammar and Reader.

ENGLISH.—Composition and Rhetoric; American Literature.

BIENNIAL REPORT OF THE

MATHEMATICS—Elementary Algebra.

HISTORY—Ancient History.

SCIENCE—Physiology; Botany.

REQUIRED READINGS—"A Man Without a Country"—Hale; "Put Yourself in His Place"—Reade; "Ivanhoe"—Scott; "Essay on Warren Hastings"—Macaulay; "Tales from Shakespeare"—Lamb.

THIRD YEAR.

LATIN—Caesar; Virgil; Cicero.

ENGLISH—English Literature; Composition.

MATHEMATICS—Plane Geometry; Higher Algebra.

HISTORY—Mediaeval and Modern.

SCIENCE—Physics.

REQUIRED READINGS—"Tale of Two Cities"—Dickens, "Rasselas"—Johnson; "Tales of a Traveler"—Irving; "Snow Bound"—Whittier; Julius Caesar"—Shakespeare.

FOURTH YEAR.

ENGLISH—Composition; Intensive Study of "Hamlet;" "The Lady of the Lake."

MATHEMATICS—Solid Geometry; Trigonometry (Optional).

SCIENCE—Geology or Zoology; Astronomy.

HISTORY—Political Economy; Sociology.

PHYSICS—

REQUIRED READINGS—"Life of Frederick the Great."—Carlyle; "Daniel Deronda"—George Eliot; "Twice-Told Tales"—Hawthorne; "Essay on Plato"—Emerson.

This Course of Study is based upon a year of thirty-six weeks, and it shall be the duty of the State Superintendent of Free Schools to prescribe the necessary tests and requirements for entrance to the high schools of the State, and the order in which the subjects herein before authorized shall be taken up, and the relative time that shall be devoted to the study of each.

To the members of the Legislature of West Virginia:

Gentlemen: At the annual meeting of the West Virginia Educational Association, held in July, one thousand eight hundred and ninety-six, the undersigned were appointed as a committee to draft a bill looking to the unification of the school system of the State by establishing a course of study for high schools, whereby there may be a regular gradation from the primary schools, through the high and normal schools, up to and through the State University.

We beg leave, therefore, to offer for your consideration the following statements and to submit in connection therewith, a bill which we trust you may in your wisdom enact into a law.

In order to promote the best interests of their several school systems, the States of Minnesota, Michigan, Massachusetts, Pennsylvania, Iowa, Illinois, New York and Ohio, the states which now take the lead in educational work, have found it absolutely necessary to secure by appropriate legislation a specific course of study such as is herewith appended. As an immediate result of this legislation Minnesota has ninety-seven high schools; Michigan, two hundred and five; Massachusetts, two hundred and sixteen; Pennsylvania, two hundred and fifty-six; Iowa, two hundred and seventy; Illinois, three hundred and five; New York, three hundred and thirty-two; and Ohio, four hundred and seventy-four.

On the other hand, although West Virginia has about twenty-four so-called high schools, she has not half that number that will measure up to the standard of high schools in the States just named.

In the preparation of this course, we have duly considered the school systems of the States hereinbefore named, and have given especial attention to the report of the "Committee of Ten" of the National Educational Association, because this committee, after four years' careful consideration of the high school course of our several States and of the principal European school systems, submitted an exhaustive report which is accepted as the highest authority upon this subject. If this course of study is prescribed by law, the high schools of the State, in addition to furnishing a more thorough education than can be obtained in the common and graded schools, will serve as the very best feeders to the Normal Schools and State University.

"A State system worthy of the name will freely offer every opportunity and inducement to its entire school population to pass by systematic methods easily apprehended by those who are to receive the benefits and under popular control from the lowest seat in the primary school to graduation by a college or university of high standing."

Respectfully submitted,

VIRGIL A. LEWIS,

State Superintendent of Free Schools.

J. L. GOODKNIGHT,

President West Virginia University.

GEORGE S. LAIDLEY,

Superintendent Charleston City Schools.

J. WALTER BARNES,

Principal Fairmont Normal School.

J. R. TROTTER,

State Superintendent of Free Schools—Elect.

For some reason, unknown, the bill met an untimely death in the Committee on Education of the House and the condition of the high schools remains, for the most part, unchanged. The matter should be taken up by the Legislature without delay and provisions should be made for a course of study somewhat similar to that recommended by the committee. It will be necessary, however, to make it in harmony with the recently adopted course of study for the Preparatory Department of the University, so that there may be, as the committee recommended, "a regular gradation from the primary schools, through the high schools and normal schools, up to and through the University."

But it should be more than the course of study for the Preparatory Department. The course of study of preparatory departments has in almost every case been prepared with reference, as the name would indicate, to prepare for the regular college classes and consequently has been too narrow and too limited, except in certain lines, to afford to those who cannot go to college a good liberal elementary education. The course of study for the high schools therefore should be prepared with reference to the wants of those who will leave the high school to go out and make a living, just as well as for those who will go on to college, and should have more English, literature, composition work and history than the Preparatory Department offers.

In this connection it may be well to state, also that the distinction or dividing line between primary and graded and graded and high schools should be clearly defined in law so that those in authority may be perfectly sure that they are complying with the requirements of law that pertain to each of these. The only satisfactory division is according to the amount of work done or in other words, according to the course of study.

SCHOOL ARCHITECTURE

One of the very many hopeful signs of the rapid advance of our educational system is the increased interest in school architecture, as shown by the number of requests for plans and specifications for better school buildings constructed in accordance with approved principles of heating, lighting and ventilating. To foster this interest and to encourage the construction of buildings wherein the health of the pupils will not be impaired, the State Superintendent proposes to issue in the near future, a pamphlet on school architecture, containing several different plans and specifications for one and two room buildings of moderate cost and of tasty appearance, which, it is believed, boards of education will gladly receive and use when it is necessary to adopt plans for a new building.

The law very wisely, it would seem, places some restriction on the action of the boards of education in the selection of plans, by requiring that they shall all be submitted to the county superintendent for his approval, but unfortunately this provision of law is somewhat discarded. But even where it is followed most scrupulously it is of little practical value from the fact that very few county superintendents are sanitary experts or indeed have given the subject of school house architecture any serious consideration at all; and as their salary is very meager and no funds available, they are not able to secure the services of a competent architect. This law might well be amended by providing that all plans and specifications for new buildings shall be submitted to the State Superintendent of Free Schools, who would, out of the funds at his disposal, be able to secure the services of someone who was thoroughly competent to prepare suitable plans and would give instructions about the most minute details of construction. Or the State Superintendent might secure a number of plans for buildings of different cost and require the boards of education to adopt one of these; but no matter how it is brought about, the most careful attention should be, and doubtless soon will be given to the construction of the houses wherein the boys and girls of the State spend so much of the formative period of their lives.

INSTITUTES

Institute work in West Virginia has always been carried on under very unfavorable conditions. For some reason the State has looked upon it as almost a charity, and up to 1895, appropriated only \$500 a year. In that year this amount was increased to \$1,000 where it has since remained. But fortunately this appropriation has annually been augmented by donations from the Peabody Fund in varying amounts, from \$17,900 in 1872, to \$2,000 in 1881. In 1896 the amount was \$3,200, but in 1897 this fell to \$2,500, and in 1898, to \$2,100. As a result the State Superintendent of Free Schools was greatly hampered in his attempts to make the work more efficient and practical.

It is only when a comparison is made between the institute work in West Virginia and in other states that the niggardly policy shown by this State in providing for county institutes is evident. For the year ending June 30th, 1898, there were employed in the public schools of the State 6,808 teachers and the total amount available for institute work was \$3,100, or about 46 cents per teacher. In the State of New York where there are 34,385 teachers, or only five times as many as in our State, the amount spent for institute work was \$110,000 or \$3.20 per capita, almost eight times as much as is expended in this State. Minnesota, with only 928 more schools than West Virginia, expends \$32,000 for this very important work. But the worst of the matter is that unless the State makes a better showing by a larger appropriation, the donations from the Peabody Fund for the next year will be greatly decreased and soon may cease altogether.

But other conditions prevail which militate in a measure against the success of the institute work. One of these is the

unfortunate belief held by many people in the State that institute work should be considered as part of the "spoils" and should be given to political favorites whether or not they are prominent school men or able institute workers. Another is the equally unfortunate opinion held by certain persons that inasmuch as they have favored the State by accepting at her hands a free education at one of the Normal Schools or the University they should be given institute work even though in some cases they have taught but a few months and know practically nothing about the theory of education or the training of teachers. Such people of course are very much offended when they do not get the amount of work desired and having little else to occupy their attention devote their time during the early part of the year to making the office of the State Superintendent of Free Schools anything but a sinecure. Indeed the small amount of money available makes it necessary to employ these cheap men or to pay good men a ridiculously low salary. Fortunately the most, in fact, all of our good school men have accepted the conditions and rather than see the institutes go down, have done the work, although half of their salary went for expenses. But still some of our institutes are bored to death by the irrepressible talker or else the time is frittered away by the equally irrepressible joker. During the last two years special care has been taken in the preparation of the program that those two very objectionable persons might be held down to the regular work, and as a result, the institutes, with few exceptions, were more beneficial than ever before, and it is hoped that they will continue to increase in value until those who make the appropriations will come to believe, with the educational world, that the institute work is one of the most important factors of our free school system, and will make abundant provision for carrying it on more successfully. Too much stress cannot be laid on the value of this work and on the good it has done and is doing for the teachers of the State. But with a liberal appropriation its value could be easily doubled within two years by the employment of a certain number of regular institute instructors to take charge of the entire work. In this way instructing institutes would become a vocation instead of an avocation as it now is, and would, therefore, become a matter of careful study for those engaged in it. It may be said that if this method were adopted the work would be entirely theoretical

as the instructors would not be active teachers. The answer would be that the instructors would come to their duties fresh and well informed on the institute methods of other states instead of, as at present, worn out with a year's school work which allowed no time for preparation for anything else. Institute instructing is not, as many think, a side issue which can be followed without any preparation whatever as a means of revenue when all other work is done; neither is it an occupation in which preparation made fifteen, or even only five years ago, will suffice, but like teaching, preparation must be made for each day and special preparation for each community.

The law provides indirectly and custom has decreed that all the institutes in the State shall be held from the middle of June until the first of September; that is, during the hottest season of the year and the busiest time for those teachers who are interested in farming. Moreover, it comes in the very midst of the only season many teachers, particularly those in the cities, have for recuperating their health by a vacation or for increasing their teaching ability by attendance at a summer school. It is indeed very provoking to have to give up either in order to return for one week which the law rightly decrees every teacher shall devote to institute attendance. No one should interpret this as an argument against either the county institute or against the summer school, but rather as an argument against holding the former at the usual time. The reasons for this objection are very much stronger now, since experience has shown that very many teachers of the State wish to spend their entire summer in attendance at the summer term of the West Virginia University. It would seem therefore much more reasonable to have the regular session of the institutes sometime during the winter months when there will be no conflict. Moreover, that time would be much more appropriate, as the teachers would then be interested in their school work and would take the suggestions and the instruction back to their schools and in the succeeding weeks would put them to a practical test. The winter institute is held in many states, but it has probably attained the greatest popularity in Pennsylvania where the attendance is counted as part of the regular term of school. Whether West Virginia is prepared or not thus to remunerate her teachers for attendance at institute is perhaps a question, but there is certainly no question, in

the minds of those who have given it a thought, about the advisability of this change of time.

Since the beginning of the institute work in 1881 to the present time, the attendance has steadily increased until now it has reached almost ten thousand. The following table will show the attendance by years:

1881	4,410	1890	6,212
1882	4,699	1891	5,636
1883	4,545	1892	5,571
1884	4,975	1893	6,590
1885	5,929	1894	7,879
1886	6,088	1895	8,710
1887	6,301	1896	8,945
1888	6,302	1897	9,789
1889	6,213	1898	9,641

In Kanawha County the regular enrollment is so large that it is necessary to provide two institutes for white teachers and one for colored teachers. In two or three other counties the attendance is increasing so rapidly that a division of the institute must very soon be made, but this will not be possible until more funds are available for the work.

The program which was used in all the institutes of the State during the summer of 1898, contained for the first time, what proved to be a very valuable feature in the way of the words and music of eight or ten well known hymns and patriotic songs, some of which were not before available. As the program was handsomely printed and bound, the teachers in many places have eagerly availed themselves of some extra copies and are now regularly using the music for their school singing.

The program in full, with the exception of the music, was as follows:

INSTITUTE PROGRAM

Introductory

In the preparation of this program it has been my aim to get away from the beaten track of other years and at the same time to give the instructors an opportunity to work in their own original way, untrammelled by outlines and suggestions which perhaps would be prepared in an entirely different manner and from an entirely different standpoint than they would wish. To this end I have made the program in many places only suggestive, by simply naming the subjects and the time to be devoted to each. It is the express intention, however, that, although instructors are to treat many of the subjects in such manner as in their judgment seems best, they are to take them up one after the other in the order in which they appear in the following pages without skipping some and riding others to death. The program is full, many will say entirely too full for one week's work, but if strict attention is given to work, if useless and worse than profitless discussion is tabooed, and if the instructors will confine themselves to a conscientious discharge of their duty rather than to the clownish occupation of making fun, the program can be carried out from beginning to end.

It is hoped that every effort will be made to induce school officers and patrons to attend at least part of the time and that the instruction will be made so practical and thorough that its necessity will be easily apparent. In this way, and perhaps in no other, will we succeed in convincing the people, particularly the legislators, of the value of this work. Until we accomplish this we have very little hope of an increased appropriation, without which we shall be crippled more and more as the size of the institutes and the demands for special work increase.

BIENNIAL REPORT OF THE

As the law states explicitly that every teacher shall attend a county institute at least five full days, it would seem hardly necessary to say anything about punctuality and regularity of attendance; yet this requirement has been in force for years and there is always some trouble about non-attendance, both on the part of the teachers and the regularly appointed and paid instructors. It is clearly the duty of the county superintendents to see that the teachers get credit for the actual time they are in attendance, but it is just as clearly an assumption of authority to excuse a teacher from attendance or to give him credit for attendance unless he is actually present. In the past the teachers have had, too frequently, bad examples in the instructors, who in many cases have reported for work a day or two after the institute began. This year I shall insist that the instructors be present at half-past ten o'clock on Monday morning, and if they refuse to comply with this very reasonable and very necessary requirement I shall be under the necessity of making a reduction in salary. If we all do our part and insist on promptness, thoroughness and enthusiasm, our institutes will be both pleasant and profitable and we will go to our duties next year prepared to do more and better work.

J. R. TROTTER,
State Superintendent of Free Schools.

Program of Daily Exercises

MONDAY.

- 10:30. Call to order by County Superintendent.
 Devotional exercises, including singing "Coronation."
 Enrollment of members.
 Organization of Institute.
 Introduction of Conductors.
 Necessary preliminary work.
 Outlines of plans for the work of the Institute.
- 12:00. NOON.
- 1:30. SINGING.

1:45. HISTORY.*

I. COURSE OF STUDY IN HISTORY.

1. First two years. Biography and simple stories of heroes.
2. Third and fourth years. Stories of the Greeks and Romans and American History stories.
3. Fifth and sixth years. Regular text-book on United States History, completed, also elementary history of England.

The instructor should give just the books to be used (according to his judgment), their cost, by whom published, and if possible should have them at hand. He should show that with the exception of the U. S. History, the pupils need not buy any of these books, if the school owns one copy of each. This could be made a very practical and helpful talk.

II. CURRENT HISTORY.

1. Aims.
2. Plans or methods.
3. Materials.

Newspapers, Magazines and other periodicals, Reports, Records, Addresses, Speeches, Debates, Lectures, Pamphlets, Monographs, Travels, Observation, Pictures and Caricatures. (This too could be made into a very practical talk by any live teacher of experience. He ought to bring some of his pupils' work.)

III. THE USE OF MAPS IN TEACHING HISTORY.

1. Where to get them or how to make them.
2. How to use them.
3. Advantage of having each pupil make his own, wholly or in part.

2:30. DIVERSION.

Read twenty quotations from the Bible and from Shakespeare and have institute identify each.

*The instructor should be perfectly familiar with the Old South Leaflets, Hart & Channing's American History Leaflets and Hart's American History Told by Contemporaries, also with Channing & Hart's Guide to the Study of History.

BIENNIAL REPORT OF THE

2:50. RECESS.

3:00. SINGING.

3:10. BETTER CITIZENSHIP.

How shall we secure it?

3:40. WEST VIRGINIA. RESOURCES.

Facts and figures.

(Instructors should provide themselves with the Chief Mine Inspector's Report, "The Mountain State" (Prepared for distribution at the World's Fair) The Commissioner of Labor's Report, and the June, 1897, School Journal.)

4:10. DISMISSION.

MONDAY EVENING.

IN ORDER THAT THE TEACHERS and instructors may become acquainted, there should be a social session this evening. Open with a general discussion of the value of institutes and the necessity of a larger appropriation for carrying on the work. If any members or prospective members of the Legislature are in the neighborhood give them a special invitation to be present.

TUESDAY.

9:00. OPENING EXERCISES.

9:30. LANGUAGE.

1. WHEN AND WHY TAUGHT AS A SPECIAL SUBJECT?

II. ORAL WORK BY QUESTIONS.

1. About objects.
2. About pictures.
3. Appealing to the imagination.

III. ORAL REPRODUCTION OF STORIES.

IV. BOARD AND PAPER OR SLATE WORK.

V. WRITTEN WORK.

1. Copying.
2. Writing results of observation, after good oral expression.
3. Answering questions.
4. Writing, in original language, knowledge gained in previous lessons.

10:15. HEALTH OF PUPILS AND TEACHERS.

I. DIET.

II. DRESS.

III. WORK AND RECREATION.

IV. HABITS.

10:45. RECESS.

11:00. SCHOOL LAW.

I. THE COMPULSORY ATTENDANCE ACT.

1. When pupils must start to school.
2. Who inform against parent or guardian.
3. Duty of teachers.
4. Duty of trustees.
5. Duty of justices.

11:30. THE ENGLISH LANGUAGE.

I. ELEMENTS.

1. Origin and examples of Saxon Element.
2. Origin and examples of French Element.
3. Other Elements.
4. Importance and number of words in each element.

II. CHANGE.

1. Spelling.
2. Meaning.

III. GROWTH.

IV. SHORT HISTORY OF

1. Angles,
2. Saxons,
3. Jutes,
4. Normans,
5. Celts.

(Every teacher should be familiar with the origin and growth of his native language. Make this a plain, practical lesson. Teachers should take notes.)

12:00. DISMISSION.

1:30. SINGING.

1:45. HISTORY.—Continued.

IV. LOCAL HISTORY.

1. Aims.

- a. To connect the home and the school.
- b. To connect the present and the past.
- c. To connect the local and the general.
- d. To inculcate patriotism.
- e. To teach the use of sources.

2. Sources.

Old newspapers, periodicals and books.

Records; national, state and local.

Letters, diaries and MSS.

Traditions, stories (local), legends, and recollections.

Pictures that in any way illustrate life at the period studied.

Old weapons, uniforms, utensils, and relics. (A loan collection might be made.)

Monuments.

Excursions to points of historic interest.

3. Methods; gathered material.

Sift, classify and arrange in order.

Assign different topics to various pupils for careful investigation and report.

Make a careful study of the industries of the town,

Describe present condition of the town and needed improvements.

Invite the parents in to hear this history read.

2:30. DIVERSION.

Instructor will pronounce twenty well known geographical names and require all the institute to write them. He will then call on a member of the institute to spell one name and locate the place and will proceed thus, giving one word only to each member.

2:50. RECESS.

3:00. SINGING.

3:10. PENMANSHIP.

I. SLANT OR VERTICAL. WHICH?

II. HOW CAN WE MAKE BETTER WRITERS?

3:40. SCHOOL ARCHITECTURE.*

4:10. DISMISSION.

TUESDAY EVENING.

A LITERARY PROGRAM, consisting of music, recitations, discussions, and debate, should be arranged beforehand by the county superintendent.

WEDNESDAY.

9:00. OPENING EXERCISES.

9:30. LANGUAGE.

*This is one of the most important subjects in the whole program, as the health and future usefulness and happiness of our public school pupils is dependent to a great extent on the lighting, heating and ventilating of the school rooms. Be thorough and practical.

BIENNIAL REPORT OF THE

V. WRITTEN WORK.—Continued.

1. Picture stories.
2. Reproduction work.
 - a. What it is.
 - b. Prose. Kinds of.
 - c. Poetry. Why use.
 - d. Silent reading by pupils and reproduction of story.
 - e. List of poems, suitable for reproduction work.
3. Topical outline of poem, illustrated.
4. Journeys supplementing geography.
5. Illustrated papers.
6. Letter writing.
 - a. Teach heading, salutation, body, complimentary close, signature, and superscription. Much application of knowledge.
 - b. Letters written based on geography, history, and science lessons.
 - c. Reproduction of poems and stories in the form of letters.
7. Classification of language papers.
8. Methods of correcting papers.
9. Dictation work.

10:15. ALCOHOLIC DRINKS AND NARCOTICS.

I. THE LAW.

1. Read section 11a.
2. When enacted.
3. Why enacted.
 - a. Intemperance prevalent.
 - b. Great ignorance of effects of alcoholics and narcotics.
4. Purpose.

II. EFFECTS.

1. On the body.
2. On the morals.
3. On the State at large.

III. METHODS OF INSTRUCTION.

This is one of the very important topics on the

program. Instructors should be very explicit in their talks so that teachers may go out prepared to give practical and effective instruction on the effects of alcoholic drinks and narcotics and thus do their part in combating with this great evil.

10:45. RECESS.

11:00. SCHOOL LAW.—Continued.

II. SCHOOL OFFICERS.

1. County Superintendent.
 - a. Term of office.
 - b. Duties.
 - c. Salary.
2. Board of Education.
 - a. When elected.
 - b. Length of term.
 - c. Powers and duties with reference to
 - (a). Laying levy.
 - (b). Fixing salary.
 - (c). Appointing trustees.
 - (d). Allowing bills for certain work.
 - (e). Changing district lines.
 - d. Extent of supervision over
 - (a). School buildings.
 - (b). Trustees.
 - (c). Teachers.
3. Trustees.
 - a. Number and length of term.
 - b. Powers and duties with reference to
 - (a). Employing teachers.
 - (b). Visiting school.
 - (c). Reporting non-attendance.
 - (d). Suspending pupils.
 - (e). Discontinuing schools.
 - (f). Granting use of school house.
 - (g). Signing Monthly Summary.

Trustees have not the power to employ a teacher who has not attended institute five full days. Trustees who do this utterly ignore their oath.

12:00. NOON.

1:30. SINGING.

1:45. HISTORY.—Continued.*

V. HISTORY THROUGH LITERATURE.

Show how history may be learned through a study of the works of Irving, Hawthorne, Lowell, Whittier, Longfellow, Scott, Simms, and others. This topic should be made very definite. There is no time for general remarks. The instructor should know the main point and bring it out. To be able to do this he must be able to give with careful discrimination the exact bearing of the story or the poem. If possible he should have a cheap but good edition of the book with him.

2:30. DIVERSION.

Exercise in diacritical marking.

2:50. RECESS.

3:00. SINGING.

3:10. BETTER PAY FOR BETTER TEACHERS.

3:30. TEACHERS AND TEACHING.

Do our teachers work as thoroughly, honestly and conscientiously as they would at a trade or in business?

4:10. DISMISSION.

THURSDAY.

9:00. OPENING EXERCISES.

9:30. ADVANCED READING.

This subject is to be developed by each instructor in his own particular way. Do not pass it over lightly. It is too important to be slighted.

10:15. ARITHMETIC or NATURE STUDY.

10:45. RECESS.

11:00. SCHOOL MANAGEMENT.

I. THE RECITATION.

1. Written,
2. Oral,
3. Combined.

II. STUDY.

III. WHISPERING.

IV. THE PLAY GROUND.

V. EMERGENCIES.

VI. THE FIRST DAY.

(This should be a practical talk suited particularly to the young teacher. Make the discussion informal. Discuss actual experiences).

11:30. SIMPLE APPARATUS.

I. "HOME-MADE."

II. USE.

12:00. NOON.

1:30. SINGING.

1:45. HISTORY.—Concluded.

VI. THE TEACHER AND THE RECITATION.

1. Limitations.
2. Preparation.

VII. THE RECITATION.

1. Purposes.
 - a. To test the pupil's knowledge.
 - b. To furnish the pupils an opportunity for the comparison and discussion of facts.

BIENNIAL REPORT OF THE

c. To furnish the teacher an opportunity for interpreting the philosophy of events.

2. Methods.

a. Have pupils discuss topics without suggestions or questions from the teacher. (Teachers ask too many questions.)

b. Have pupils prepare a written question on every lesson. Not a simple question to be answered by yes or no, but a searching question that will arouse interest.

c. Have pupils engage in formal debate.

d. Have frequent short written exercises.

e. Use a map with every lesson.

f. Have frequent surprises in method of recitation.

2:30. DIVERSION.

2:50. RECESS.

3:00. SINGING.

3:10. COUNTY SUPERINTENDENCE.

How can it be made more effective?

3:40. METHODS OF AROUSING INTEREST AMONG PATRONS.

4:10. DISMISSION.

THURSDAY EVENING.

GENERAL DISCUSSION of one or more of the following topics.

1. Should County Superintendents be permitted to teach "Summer Normals?"
2. What should be done with "The School Fund?"
3. What should be the unit for school taxation?
4. Should we have uniform examinations?
5. How can we secure better supervision of our country schools?
6. Should each county have a high school, supported in part by the State, to which pupils who are

prepared to take the course of study shall be admitted free?

7. What is the weakest point in our educational system?
8. What reforms in our school law are needed?
9. Should teachers after a certain period of work be pensioned?

FRIDAY.

- 9:00. OPENING EXERCISES.
- 9:30. WHAT SHALL THE TEACHER READ?
- 10:00. CUBA AND THE PHILIPPINE ISLANDS.

I. LOCATION.

II. SIZE.

III. POPULATION.

1. Number.
2. Nationality.
3. Religion.
4. Characteristics.

IV. GOVERNMENT.

- 10:45. RECESS.

- 11:00. THE ARMY AND THE NAVY.

I. THE ARMY.

1. Size in time of peace.
2. Principal officers.
3. Officers from West Virginia.
4. Distribution.
5. Number enlisted during war with Spain.

II. THE NAVY.

1. Number and description of
 - a. Monitors.
 - b. Battle-ships.
 - c. Cruisers.

BIENNIAL REPORT OF THE

- d. Armored Cruisers.
- e. Protected Cruisers.
- f. Dynamite Cruisers.
- g. Dispatch Boats.
- h. Gunboats.
- i. Torpedo Boats.
- j. Torpedo Boat Destroyers.
- k. Rams.

11:30. WAR WITH SPAIN.**I. ORIGIN.****II. PROGRESS.**

- 1. Army.
- 2. Navy.

III. ATTITUDE OF THE POWERS.**IV. PRIVATEERING AND PIRACY.****V. INTERNATIONAL LAW.****12:00. NOON.****1:30. SINGING.****1:45. REPORT OF COMMITTEES.**

Miscellaneous business, including voting on time
and place for next institute.

Distribution of certificates of attendance.

SINGING AND ADJOURNMENT.

ARBOR DAY

Although Arbor Day has been observed in West Virginia but a few years, and although, owing to the naturally wooded condition of the State, the planting of trees is not so necessary as in other states, the annual reports that come to the office of the State Superintendent indicate that interest in the planting of trees and particularly in the exercises of the day is increasing to a very gratifying degree. In the fall of each year an Arbor Day proclamation has been issued by the State Superintendent of Free Schools and a full and complete program of exercises for the occasion has been printed in the West Virginia School Journal. In the proclamations that have been issued for the past two years special stress has been laid upon the advisability, or even the necessity, of beautifying the interior of the rooms and of arousing a lasting interest in the minds of the patrons by securing their cooperation in this very important work. In many schools the day has been taken as an occasion for raising a small amount of money for the purchase of books by charging a small admission fee to the exercises, and, as a result, outside of the immediate benefits in arousing renewed interest in education, there has been established the nucleus of a library which will benefit pupils for generations to come.

But there is much profit in the way of tree planting and beautifying the grounds; for not only is the aesthetic side of the pupil's nature educated, but an interest is aroused in the laws of plant life and in the conditions that govern its growth. In the older states where the educational systems, by reason of their age, are more developed than ours, the necessity is felt of paying much attention to the study of nature. Fortunately in West Vir-

ginia every pupil has at the school house door an ideal place for the study of nature in all its rugged beauty, and, it is believed, many pupils of the public schools will be aroused by the exercises of Arbor Day to a study of the products of forest, fields, and mine, which will in time grow to a practical knowledge that will lead to the development of our wonderful resources.

In many states public recognition of Arbor Day has been given by an act of legislature which provides generally that at the proper season the Governor or State Superintendent of Free Schools shall issue a proclamation calling attention to the day and recommending and enjoining its due observance. West Virginia, to the front in many other respects, might do well to emulate the example of the other states by providing by law for the annual observance of this day.

The following proclamation and program was published in the West Virginia School Journal for October, 1898, and through that medium was placed in the hands of two-thirds of the teachers of the State.

Arbor Day Proclamation

State of West Virginia

Department of Free Schools.

In conformity with a custom that has long prevailed in this and other States, and in compliance with public sentiment I hereby designate

FRIDAY, NOVEMBER 18, AS ARBOR DAY,

and I recommend that all public schools, colleges and other educational institutions of the State and the citizens generally manifest their interest in our educational system by uniting on that day in such exercises as may be appropriate to the occasion. I again call attention to the importance of beautifying the interior as well as the exterior of our public schools and suggest that a special effort be put forth to make the school rooms bright and cheerful.

Let the exercises of the day be carried on so enthusiastically and yet so discreetly that the citizens of the State may be aroused to renewed efforts in advancing the cause of education.

J. R. TROTTER,

State Superintendent Free Schools.

Charleston, October 28, 1898.

Arbor Day Program

Song

ARBOR DAY.

Air—"Hold the Fort."

"Arbor Day has come at last,
The long expected day.
Now we meet to greet you all,
For this is Arbor Day.

Chorus.

Arbor Day has come at last,
And we are bright and gay.
All hearts join in happy songs,
For this is Arbor Day.

Hail the great and glorious name
Of Him whose love we see—
Everything in Nature's dress,
In flowers and birds so free.

Chorus.

As this day is passing by,
As memory's Arbor scene
We'll pluck the flowers as we sing
And plant the evergreen."

RESPONSIVE READINGS.

Scripture Lesson

Teacher: And out of the ground made the Lord God to grow every tree that is pleasant to the sight and good for food. Pupils: The tree of life also in the midst of the garden and the tree of knowledge of good and evil.

Teacher: Blessed is the man whose delight is in the law of the Lord. Pupils: He shall be like a tree planted by the streams of water that bringeth its fruits in its season, whose leaf also doth not wither, and whatsoever he doeth shall prosper.

Teacher: Blessed is the man that trusteth in the Lord, and whose hope the Lord is. Pupils: For he shall be like a tree, planted by the water, which spreadeth out its roots by the river, and shall not fear when heat cometh, but her leaf shall be green, and shall not be careful in the year of drouth, neither shall cease from yielding fruit.

Teacher: For there is hope of a tree, if it be cut down, that it will sprout again, and that the tender branch thereof will not cease, though the root thereof was old in the earth; and the stock thereof die in the ground. Pupils: Yet through the scent of water it will bud and bring forth boughs like a plant.

Teacher: Every good tree bringeth forth good fruit. Pupils:
But a corrupt tree bringeth forth evil fruit.

Teacher: A good tree cannot bring forth evil fruit. Pupils:
Neither can a corrupt tree bring forth good fruit.

Teacher: Whereof by their fruits ye shall know them. Pu
pils: Make the tree good, and his fruit good; for the tree is
known by his fruit.

All: To him that overcometh will I give to eat of the tree of
life, which is in the midst of the Paradise of God.

Recitation

THE TREES.

"I will not walk with men today
But I will go among the blessed trees—
Among the forest trees I'll take my way
And they shall say to me what words they please.

And when I come among the trees of God
With all their million voices sweet and blest
They gave me welcome. So I slowly trod
Their arched and lofty aisles, with heart at rest.

Then all around me as I went
Their loving arms they lightly bent
And all around leaf voices low
Were calling, calling, calling soft and low." —From The Trees.

Reading

ARBOR DAY.

The observance of a tree-planting anniversary should be attended with memories as sweet as the anniversary of the baby's birthday. The school should be remembered and additions made to its grounds; the home should be remembered, and improvements made on the lawn; animals should be remembered, and wind-breaks set out, that they may have better protection from the cold weather of fall and spring; the birds should be remembered, and trees planted where they may find sanctuaries from their enemies and nesting-places for their families, to the end that the insect world may be kept in check.

The young should plant trees in recognition of the obligations they owe to those who planted trees for them. The old should plant trees to illustrate their hope for the future and their concern for those who are to come after them. The economist should plant trees, especially in the prairie country, to beautify the land-scape and ameliorate the sweep of the north wind. And as we plant trees on Arbor Day a kindred feeling to that experienc-

ed on the Fourth of July should possess us. For the time being, we are one in mind; we are one people, engaged in something to do good to mankind.—James Wilson, Secretary of Agriculture.

Recitation

THE TREE'S DREAM.

Little green tree, so slim and so small,
 Standing under the schoolhouse wall,
 Planted there upon Arbor Day.
 Tell me what are you doing, say?
 So quiet you stand, and so still you keep,
 I really believe you have gone to sleep.

"Oh, I'm dreaming now," said the little tree,
 "Of the pleasant days that are to be;
 Of the robins and bluebirds that every spring
 Will come and sit in my boughs and sing.
 Oh, plenty of company I shall see
 In my gay green tent," said the little tree.

"I'm dreaming of all the little girls,
 In gingham aprons and yellow curls,
 That under the shades of my leafy boughs
 Will make for themselves a wee play-house,
 With nice bur baskets, the dear little souls!
 And pepper-pod teapots and sugar-bowls.

I'm dreaming of the barefoot boys
 That will fill my branches with merry noise
 And climb my limbs like an easy stair,
 And shake down my nuts till the boughs are bare.
 Oh, a jolly good comrade I shall be
 When I grow up!" said the little tree.

—Elizabeth H. Thomas, Youth's Companion.

Reading

A TROPICAL FRUIT TREE.

Although the fruits of the tropics seldom ripen in temperate climates, the trees are often cultivated merely for the beauty of their foliage; so that it may prove of interest to become further acquainted with their general appearance and uses in their far-off native habitats.

The beautiful date palm is indigenous to Africa and Asia, though flourishing in all hot countries. There are said to be nearly a thousand species, the most vigorous specimens reaching the height of eighty feet and living for two hundred years. Each tree yields from 160 to 200 pounds of fruit in a single season, some of the clusters weighing nearly forty pounds. It is propagated by suckers from the root, whence its name of "Phoenix," and it bears its first crop when about eight years of age.

No less than three hundred and fifty uses are claimed for this

invaluable tree. The trunk furnishes timber for furniture and house-building as well as fuel, cooking utensils and bows and arrows; the roots are utilized for fencing and roofing, and the fiber is woven into mats, fish nets, ropes, baskets and articles of clothing. Among the natives of the Orient the nutritious fruit is the principal food for nearly the entire year, and, pounded into solid cakes, is carried by Arabs journeying over the scorching desert, the stones being used as fodder for the camels. Roasted and ground, the kernels make a fair substitute for coffee, and are also valued on account of their oil.

These trees are sometimes known as the "palms of victory," as the large, frondlike leaves are supposed to be identical with those that were strewn before the Saviour on his entry into Jerusalem, and that were borne with songs of rejoicing before ancient conquerers returning from their triumphs on the battle field; while on Palm Sunday and at the Jewish Feasts of Tabernacles they are highly prized as church decorations. In some varieties the flower-spathes yield a large quantity of sweet sap, which upon evaporation becomes "date sugar," this being fermented into an intoxicant called "arrack." The terminal bud, or "cabbage" is considered a great delicacy, and is boiled and eaten like a vegetable.—Bertha F. Herrick.

Song

WELCOME, ARBOR DAY.

Tune—"America."

O welcome, Arbor Day,
List Nature's welcome lay
With joy replete.
O day of festal mirth,
Of beauty, sense, and worth.
Thou to adorn the earth,
Hath mission sweet.

When thy glad morn appears,
Bright hopes of future years
Our thoughts employ.
Day of unselfish deeds,
When care for others' needs
Shall freely plant the seeds.
Of future joy.

All praise to him whose hand
Shall bless our native land
With gifts so free.
To him may Nature bring
Her choicest offering,
And birds His praises sing,
Who plants a tree.

—Journal of Education.

Recitation**WITH DAD A-BILIN' SAP.**

There's lots o' frolic happenin' to boys o' eight years old,
 No matter ef it's scorchin' hot, ner ef it's freezin' cold;
 But when the winter's back is broke, an' sap begins to run,
 Say, what's jes' like a sugar-bush fer havin' lots o' fun?

Nights o' frost and days o' sunshine, an' the freshest kind o' air,
 Snow all gone except in patches layin' lonesome here an' there,
 Sugar-bush o' twenty acres, three four hundred trees to tap;
 Days o' happiness a-comin' with yer dad a bilin' sap!

Useter think in them there days 'at school it never would let out,
 But when it did, jes' lemme say, they riz a gin'ral shout;
 'Twas then we'd grab our old grub-pail an' jes' more'n grab our cap,
 'N' skedaddle for the sugar-bush where dad was bilin' sap.

Bill Brown, he couldn't stand it, an' he took 'n' run'd away
 'N' tolt his pap the teacher let him off fer "jes' that day;"
 Sezee, 'I'll get a whoppin' sure—you s'pose I care a rap?
 "What's a lickin' fer a day along o' dad a-bilin' sap?"

What'll beat a frosty moonlight night, the arch a-roarin' high,
 Half a dozen neighbors' boys around a-feelin' good an' spry—
 Taters roastin', eggs a bilin'—jes' a bar'l o' fun on tap—
 A-watchin' in the sugar-camp with dad a-bilin' sap?

It's pretty nice in harvest when they're haulin' in the grain,
 An' it always seems a hundred years 'fore thrashin' comes again
 Take 'em both—throw in hog-killin' an' the hull ain't worth a snap.
 Aside them days o' glory 'long o' dad a-bilin' sap.
 —Grant Showerman.

Reading**A CLUSTER OF CURIOUS TREES.****First Pupil.**

The Musical Tree has a peculiar shaped leaf, and pods with a split or open edge. The wind passing through these gives out the sound which gives the tree its name. In Barbadoes there is a valley filled with these trees, and when the trade winds blow across the island, a constant moaning, deep-toned noise is heard from it, which, in the still hours of night, has a wierd and unpleasant effect.

Second Pupil.

A species of acacia, in the Soudan, is called the Whistling Tree by the natives. Its shoots are frequently, by the agency of the larvae of insects, distorted in shape and swollen into a globular bladder, from one to two inches in diameter. After the insect has emerged from a circular hole in the side of this swelling, the opening played upon by the wind becomes a musical instrument equal in sound to a flute,

Third Pupil.

The Bottle Tree of Australia is among the most singular specimens of vegetable life. As the name implies, it is bottled shaped, increasing in girth several feet from the ground and then tapering toward the top where it divides into two or more huge branches bearing foliage composed of narrow lance-shaped leaves from four to seven inches long. It sometimes grows to the height of sixty feet and measures thirty-five feet around the trunk.

Fourth Pupil.

The Angry Tree is a native of Australia. It reaches the height of eighty feet after a rapid growth, and in outward appearance somewhat resembles a gigantic century plant. When the sun sets the leaves fold up and the tender twigs coil tightly, like a little pig's tail. If the shoots are handled the leaves rustle and move uneasily for a time. If this queer plant is moved from one pot to another it seems angry, and the leaves stand out in all directions like the quills on a porcupine. A most pungent and sickening odor, said to resemble that given off by rattlesnakes when annoyed, fills the air, and it is only after an hour or so that the leaves fold in the natural way.

Fifth Pupil.

Weeping Trees are found in the forests of Washington and British Columbia. These trees drip copiously during clear, bright days, when no dew is visible elsewhere. The dripping is so profuse that the ground is almost saturated. The phenomenon in this case is caused by the remarkable condensing power of the leaves of the fir. The dripping ceases after 10 or 11 o'clock in the morning, but resumes at or near sunset. In the Island of Ferro there is a weeping tree that supplies all the men and beasts of the island with drink, there being no other available water supply.

Sixth Pupil.

The Baobab or Monkey Bread must be the queerest of trees. It grows to the height of forty feet, but its girth is entirely out of proportion to its height, some trees being thirty feet in diameter. An old baobab in Africa is more like a forest than a single tree. Their age is incalculable. Humboldt considers them the oldest living organic monument of our planet. It produces fruit about a foot long, which is edible.

Seventh Pupil.

The Bread Fruit Tree is one of the most ornamental and symmetrical trees in the world. It is native to the islands of the Pacific ocean. The tree towers to the height of about fifty feet. Its green, globular fruit, when baked, offers a very acceptable substitute for bread.

Eighth Pupil.

The Stinging Tree is found in Queensland. It emits a peculiar and disagreeable smell, but is best known by its leaf, which is nearly round, and, having a point at the top, is jagged all around the edge like a nettle. A traveler says: "I have seen a man, who treats ordinary pain lightly, roll on the ground in agony after being stung. I have known a horse so completely mad, after getting into a grove of these trees, that he rushed open-mouthed at everyone who approached him and had to be shot. Dogs, when stung, will rush about, whining piteously, biting pieces from the affected part."—New York Program.

Recitation**THE KINGSHIP OF THE TREES.****First Pupil:**

Long since, when winds were calm and growth was old,
Over the trees a silence came;
And there were musings manifold,
And then a whisper, last a name,
Which tree was worthy fame.

As men contend for name and fame, so they
Contended there which one should be
The king and wear the Crown of May;
Their voices rose as waves at sea,
And thus they spake,—each tree.

Second Pupil (representing the maple):

I am the maple, beautiful and tall;
No fruit bear I but calmly wait
Till perfect leaves and hues of fall
Shall grace my place at Beauty's gate.
I'm chosen Tree of State;
And beauty's best, so I'll be king!

Third Pupil (representing the oak):

I brave the storm, for I am the hardy oak,
And toss my branches to the sky;
I scorn the blinded lightning's stroke,
And laugh when rolling clouds are by,
O type of strength am I:
And strength is best, so I'll be king.

Fourth Pupil (representing the pine):

I grow on mountain heights, my spirit free,
 The lofty, silent, prayerful pine:
 The winds and snows find rest with me,
 And men seek out this calm of mine
 To dream of things divine.
 And peace is best, so I'll be king!

Fifth Pupil (representing the elm):

I am the elm and love to dwell alone:
 The clinging vine is wed to me,
 And oft our hearts when peaceful grown
 Commune with earth and sky and sea,
 To learn their majesty.
 And wisdom's best, so I'll be king!

Sixth Pupil:

Then Nature gently rose and queenly spake,
 Her voice as soft as summer air;
 "My children dear, advice now take,
 And learn of me the word of care,
 That only freedom's rare.
 "Seek no kinship; there is no first nor best;
 The best is being best you can;
 Live more of life and never rest;
 Each has a work that God began,
 And all are in his plan."

The trees (in concert):

We'll seek no kinship; there is no first nor best;
 The best is being best we can,
 Then more of life and never rest;
 We have a work that God began,
 And all are in his plan.
 —Charles Augustus Schumaker.
 In Michigan Arbor Day.

Recitation

THE NOBLE NATURE.

It is not growing like a tree
 In bulk doth make men better be;
 Or standing long an oak three hundred years,
 To fall a log at last, dry, bald, and sere;
 A lily of a day
 Is fairer far in May,
 Although it fall and die that night,
 It was the plant and flower of light.
 In small proportions we just beauty see:
 And in short measures life may perfect be.
 —Ben Jonson.

Recitation

AN ARBOR DAY TREE.

Dear little tree that we plant today,

What will you be when we're old and gray?
 "The saving bank of the squirrel and mouse,
 For robin and wren an apartment house,
 The dressing room of the butterfly's ball,
 The locust's and the katydid's concert hall,
 The schoolboy's ladder in pleasant June,
 The schoolgirl's tent in the July noon.
 And my leaves shall whisper them merrily
 A tale of the children who planted me."
 —Youth's Companion.

Reading

FAMOUS TREES.

The "Burgoyne Elm" at Albany, N. Y. This tree was planted on the day the British general, Burgoyne, was brought a prisoner into Albany, the day after he surrendered to our army in the Revolutionary war.

The weeping willow in Copp's burying ground near Bunker Hill. This willow was grown from a branch that was taken from the grave of Napoleon Bonaparte at St. Helena.

The ash trees planted by General Washington at Mt. Vernon, Va. This is a beautiful row of immense trees, which everybody admires who visits the home of the Father of his Country.

The Cary tree. This tree was planted by Alice and Phoebe Cary, the poet sisters, who have written so many beautiful poems for children. It is a beautiful sycamore in Ohio.

Old "Liberty Elm." This famous tree used to stand on Boston common, but was blown down in a storm. It was planted by a school master long before the Revolutionary war and dedicated to the liberty of the colonies.

Washington Elm. Under the shade of this grand old elm General Washington first took command of the colonial army in 1775.

The William Penn tree in Philadelphia. In this city stands a monument which marks the spot where once stood the tree under which William Penn made his famous treaty with the Indians.

The Charter Oak. It was in an old hollow oak that the early colonists hid their charter to prevent its being taken from them by the British governor, Andros.

Arbor Day was started in Nebraska twenty-two years ago. Ex-Governor Morton was the founder of it.

Forty-four states and territories have adopted Arbor Day, and millions of trees are set out every year.

The first planting of trees in honor of the memory of distinguished people took place in Cincinnati, Ohio, about twelve years ago.—North Dakota Program.

Song

THE PLANTING OF THE TREE.

Air—"Auld Lang Syne."

In soil the dearest and the best
On which the sun can shine,
We plant thee, tree, in hope to-day,
Oh let our cause be thine!
Strike deep thy roots, wax wide and tall,
That all this truth may know,
Thou art our type of future power;
Like thee, we, too, shall grow.

Refrain:—

Like thee we, too shall grow,
Like thee we, too shall grow;
Thou art our type of future power,
Like thee we, too shall grow.

In coming years their kindly shade
The sons of toil shall bless;
Thy beauty and thy grace shall all
With grateful voice confess;
And so our youth in wisdom trained
Shall render service great;
Our schools send sons and daughters forth,
The glory of the State.

Refrain:—

The glory of the State,
The glory of the State,
Our schools send sons and daughters forth,
The glory of the State,

Strike deep thy root, wax wide and tall,
Since thou our pledge shall be
Of all the good we vow to bring
Our country grand and free.
In place of one by axe or age
Cut off, long may'st thou stand;
We march to take our fathers' room
And do the work they planned.

Refrain:—

And do the work they planned,
And do the work they planned,
We march to take our fathers' room
And do the work they planned.

WEST VIRGINIA EDUCATIONAL ASSOCIATION

The West Virginia Educational Association, which was organized in Parkersburg in 1870, continues to grow steadily in size and in importance until now all the principal school men of the State show their interest by attending the sessions and by taking part in the discussions, which are usually confined to phases of the educational work of the State, varying from kindergarten to university.

The session for 1898 was held in the High School building at Wheeling, June twenty-ninth and thirtieth and July first, the date fixed by the constitution. Unfortunately the time for the beginning of the summer term of the University was fixed for Friday, July 1st, so that it was necessary for many of the professors and instructors of that institution, some of whom were on the program, to absent themselves for the last day, much to the regret of all in attendance. As the State Educational Association affords the only opportunity for the commingling of all the teachers of the State, it was very unfortunate that the date for the opening of the University was not deferred at least two days. It is hoped therefore that, inasmuch as all the educational people of the State must work together harmoniously and enthusiastically to advance their common interest, the date for the opening of the summer term of the University, which is not fixed by constitution or by-laws as is that of the State Educational Association, may be set, in the future, so as to avoid a conflict.

The following officers were elected for the ensuing year:

J. R. Trotter, ex-officio, president.

D. T. Williams, Vice President, 1st district.

A. C. Kimler, 2nd district.

Josiah Keely, 3rd district.

L. J. Corbly, 4th district.

A. J. Wilkinson, Secretary.

Thomas C. Miller, Treasurer.

White Sulphur Springs was selected as the next place of meeting.

The program was as follows:

WEDNESDAY, JUNE 29TH, 10:30 A. M.

MUSIC.

INVOCATION.

11:00. DISCUSSION.—"Needed Amendments to the Compulsory Attendance Act."—H. A. Darnall, Buckhannon; G. W. Russell, Wellsburg; J. M. Skinner, Sistersville; B. H. Hall, New Martinsville; H. S. Whetsel, Kingwood; C. H. Cole, Martinsburg; C. W. Evans, Fairmont; and others.

12:00. RECESS UNTIL 2 P. M.

2:00. ADDRESS.—“Is the Classical Course Practical?”—L. C. Woolery, Morgantown.

DISCUSSION.—H. B. Work, Wheeling; George S. Laidley, Charleston; G. M. Ford, Athens; A. C. Kimler, Sheperdstown.

2:45. ADDRESS.—“Manual Training in the Country Schools,” F. L. Emory, Morgantown.

3:15. RECESS.

3:30. ADDRESS.—“The Work a Normal School may do.”—C. J. C. Bennet, San Jose, California.

DISCUSSION.—E. M. Turner, Morgantown; W. J. Holden, Glenville; R. A. Armstrong, Morgantown.

RECESS UNTIL 8 O’CLOCK.

8:00. MUSIC.

LECTURE.—“Dr. Jekyll and Mr. Hyde.” — Robert Nourse.

FRIDAY, JULY 1ST, 9 A. M.

MUSIC.

INVOCATION.

MUSIC.

9:30. ADDRESS.—“Uniform Examinations.”—R. A. Riggs, Pt. Pleasant.

DISCUSSION.—J. C. Gwynn, Wheeling; A. L. Wade, Morgantown; W. H. McDaniels, Mannington.

10:00. ADDRESS.—“The Geological Survey of West Virginia.”—I. C. White, Morgantown.

10:30. RECESS.

10:45. PAPER.—“West Virginians Abroad.”—Waitman Barbe, Morgantown.

11:15. PAPER.—“Essential Elements of History.”—H. B. Work, Wheeling.

DISCUSSION.—Virgil A. Lewis, Mason; Richard E. Fast, Morgantown.

12:00. RECESS UNTIL 2 O’CLOCK.

2:00. MUSIC.

REPORTS OF COMMITTEES.

ADJOURNMENT.

The following resolutions were adopted:

1. That this association endorses the introduction of the compulsory attendance of pupils on the schools, and favors such further legislation from time to time as experience may show to be necessary to make it thoroughly effective.

2. We favor more efficient county supervision, and to this end recommend that the salary and the authority of the county superintendent be increased so as to secure the services of the most capable persons for this important office.

3. We favor a higher standard of qualification for teachers and to this end, the establishment of high schools, and the more thorough development of the normal schools, along the line of professional training.

THE W. VA. TEACHERS' ASSOCIATION

The West Virginia Teachers' Association, organized by the colored teachers of Charleston in 1891, has now a membership of more than forty of the leading colored teachers of the State. Though this number seems small, it represents sixteen and two-thirds per cent. of the colored teachers of the State and in comparison with the attendance of the white teachers at their State Association, which is barely two and one-half per cent. of their number, it makes a magnificent showing for the colored teachers of the State. It is worthy of note also, that, among the forty enrolled, there were graduates from ten or eleven of the leading colleges and universities of the land.

The session for 1898 was held in Huntington, November twenty-fourth and twenty-fifth with President Prillerman presiding, this being the seventh year he has held that position.

The program was as follows:

FIRST DAY, THURSDAY, 10:30 O'CLOCK A. M.

DEVOTIONAL EXERCISES

MUSIC.—America.

ROLL CALL.—Reading Minutes of Last Session.

MUSIC.—“The Star Spangled Banner.”

PAPER.—“The Nation's Debt of Gratitude.”—Mrs. M. A. W. Thompson, teacher at Dego.

DISCUSSION.—C. W. Boyd, Principal of Garnett School, Charleston, and John R. Jefferson, Principal of the Summer School, Parkersburg.

BIENNIAL REPORT OF THE
GENERAL DISCUSSION.

ENROLLMENT OF MEMBERS.

AFTERNOON, 2:30 O'CLOCK.

MUSIC.

PAPER.—“The Importance of Industrial Education for Girls.”—Miss Flayvilla D. Brown, Teacher of Sewing in the West Virginia Institute.

DISCUSSION.—C. H. Barnett, Principal of the Douglass School, Huntington, and A. W. Puller, Principal of the Langston School, Point Pleasant.

PAPER.—“The Need of Higher Education in West Virginia.”—John C. Gilmer, Teacher in the West Virginia Institute.

DISCUSSION.—Hamilton Hatter, Principal of the Bluefield Institute, Earnest E. Osgood, Principal of Storer College, and J. McHenry Jones, Principal of the West Virginia Institute.

PAPER.—“What Can Our Public Schools Do for Their Pupils?”—W. W. Mayle, Principal School, Grafton.

DISCUSSION.—S. H. Guss, Principal School, Clarksburg, and Harris Smith, Principal School, Bluefield.

ENROLLMENT OF MEMBERS.

APPOINTMENT OF COMMITTEES.

EVENING, 7:30 O'CLOCK.

MUSIC.

PRAYER.

MUSIC.

WELCOME ADDRESS.—C. H. Barnett, Principal of the Douglass School, Huntington.

RESPONSES.—R. F. Douglass, Principal of Hinton School, and John R. Jefferson.

MUSIC.

ANNUAL ADDRESS.—C. M. B. Mason, D. D.

SECOND DAY, FRIDAY, 9 50 O'CLOCK, A. M.

DEVOTIONAL EXERCISES.

BUSINESS SESSION.—Election of Officers, Reports etc.

PAPER.—“Outside the Text Book.”—Miss M. Blanche Jeffries, Teacher in the Public Schools, Charleston.

DISCUSSION.—Dr. H. F. Gamble, Revs. L. T. Christmas and D. W. Shaw, Charleston.

AFTERNOON, 2 P. M.

MUSIC.—“The West Virginia Hills!”

PAPER.—“Professional Courtesy Among Teachers.”—Mrs. M. J. Pogue, Teacher at Ceredo.

DISCUSSION.—Mrs. E. M. Dandridge and Rev. C. H. Payne.

DISCUSSION.—“Public Schools and Their Critics.”—John R. Jefferson, Rev. D. C. Dean, of Montgomery, and Rev. R. J. Perkins, of Huntington.

PAPER.—“Advantages of Uniform Examinations.”—J. W. Scott, Teacher in the Douglass School, Huntington.

GENERAL DISCUSSION.—Five Minutes Speeches.

EVENING, 7:30 O'CLOCK.

**BIENNIAL REPORT OF THE
LITERARY PROGRAM.**

MUSIC.

PRAYER.

MUSIC.

READING.—Miss Ida M. King, Montgomery, and Miss Armintha Rotan, Handley.

DECLAMATION.—Miss Lorena Tarrer, of Claremont, and Miss Amanda Washington, of Dego.

MUSIC—Solo—Miss Mary J. Jones.

ESSAY.—Miss Mary Eubank, of Fayetteville, and Miss Fannie C. Cobb, of Charleston.

ORATION.—A. C. Spurlock, of St. Albans, R. E. Douglas of Hinton, and Ralph W. White.

HISTORIAN.—Miss Josie Barnett, Huntington.

MUSIC.

REMARKS.—By Hon. James Russell Trotter, State Superintendent of Free Schools.

The resolutions adopted were:

1. That inasmuch as education is civilization, we hail with delight the many evidences of continued improvement in the educational facilities in West Virginia.

2. That we heartily endorse the arrangements of a thorough normal course for the training of teachers at the West Virginia Institute and recommend our teachers to secure the advantages offered there.

3. That we regret the withdrawal from the principalship of the above named school of Prof. J. H. Hill, who labored so arduously and successfully for its growth. We wish it continued prosperity under the new principal, Prof. J. McH. Jones.

4. That we favor the adoption of uniform examinations and uniform text-books.

5. That it is our opinion that professional and primary teachers should not apply for positions where vacancies do not exist, and that we unite in requesting boards of trustees to declare positions vacant before considering applications from others.

6. That we declare that we will not, directly or indirectly, offer ourselves as principals or teachers for positions which have not been officially declared vacant.

7. That we rejoice at the success of our arms on land and sea during the present year, a success, which, while it added to our national glory, yet imposes tremendous responsibilities upon the President, which we hope he will meet wisely with his Christian statesmanship.

8. That we denounce as uncivilized, the recent outbreak of lawlessness in certain southern states, in which, even ministers of the gospel of righteousness are reported to have mingled with and incited the mob in its barbarous slaughter of law-abiding citizens.

9. That we commend the most excellent work of our State Superintendent of Free Schools, Hon. James Russell Trotter.

10. That we urge all the teachers of the State to subscribe for and read the West Virginia School Journal.

The Colored Institute was selected as the place for the next meeting and J. A. Jefferson of Parkersburg was elected President, Miss Mary Jones of Charleston, secretary, and Mr. Byrd Prillerman of the Colored Institute, treasurer.

STATE BOARD OF EXAMINERS

Report of Secretary, for 1897

Grafton, W. Va., Oct. 1, 1897.

Hon. J. R. Trotter,
State Superintendent Free Schools,
Charleston, W. Va.

Sir:—Pursuant to the requirements of Section 29a of Chapter XIV, of the Code, I have the honor to transmit herewith the tenth annual report of the State Board of Examiners, for the year ending September 30, 1897.

The schools in addition to those named in the statute that were granted recognition for the year in the issuing of certificates, were the Conference Seminary at Buckhannon and Salem College at Salem. The fees received have never been sufficient to pay the per diem and mileage allowed the Board.

Certificates were issued to the following persons during the year:

FIRST CLASS

Eliza Mullady, Bayard.
Eugene Weaver, Jr., Elk Lick.
A. L. Rymer, Buffalo.
F. Irene Harshbarger, Tunnelton.
Charlotte J. Wilson, Cumberland, Md.
Fannie N. Davis, Cotton Hill.
Laura McClintic, Pickens.

W. W. Tapp, Harrisville.
 Maud Pugh, Pleasant Dale.
 Mattie C. Jones, Clarksburg.
 Cora Cooper, Auburn.
 J. W. Corsey, Martinsburg.
 John G. Gittings, Clarksburg.
 S. M. Hoff, Harrisville.
 J. B. Arter, Bolivar.
 Annie J. Emery, Clinton.
 F. A. Mitchell, Ceredo.
 George I. Gillespie, Handley.
 A. Mildred Dunn, Handley.
 J. L. Vincent, Topin's Grove.
 George W. Blair, Crawford.
 M. B. Strawn, Wolf Run.
 V. C. Snodgrass, Valley Mills.....23.

SECOND CLASS UPON EXAMINATION

Floyd T. Holden, Elk City.
 Fred Moore, Belington.
 J. E. Scamehorn, Brilliant, O.
 W. H. Carney, Sherman.
 Peter H. Steenbergen, Point Pleasant.
 Ada Prickett, Jackson.
 B. H. Hall, New Martinsville.
 J. M. Skinner, Sistersville.
 Ida M. Spahr, Kingwood.....9.

SECOND CLASS UPON DIPLOMAS

E. M. Johnson, Victor.
 R. L. Brooks, Sinclair.
 W. C. Barker, Leewood.
 Minnie Wynters, Sand Hill.
 H. A. Fry, Ronceverte.
 W. H. Phillips, Hedgesville.
 Will C. Houk, Packs Ferry.
 H. A. Sommerville, Elizabeth.
 Ida M. Amos, Fairmont.
 Ellen V. Martin, Cairo.
 Julia H. Jones, White Day.

Celia Betts, Ronceverte.
 Lida Sweeney, Brownsville.
 D. H. Dent, Glenville.
 W. E. Tomblyn, Buckhannon.
 V. M. Snyder, Queens.
 F. F. Farnsworth, Holly Grove.
 L. G. Aten, Letart.
 A. F. Hawkins, Philippi.
 L. W. Brown, Pruntytown.
 P. W. Cooper, Auburn.
 H. F. Fleshman, Blue Sulphur Springs.
 Miles E. Lewis, Beech Hill.
 Susan Hughes, Boothsville.
 Emory I. Ireland, Harrisville.
 J. S. Broyles, Wikel.
 J. W. Cook, Athens.
 J. E. Shires, Alderson.
 Joseph E. Anderson, Walkersville.
 George W. Conley, Craigmoore.
 Viola B. Stitzer, Clarksburg.
 Sarah P. Rogers, Elizabeth.
 Araminta C. Rotan, Winifrede.
 Una E. Chapman, Hurricane.
 M. May Hoffman, Shepherdstown.
 L. E. Bennett, Ireland.
 Maude M. Wharton, Elm Grove.
 Hayward Fleming, Grafton.
 Fred Lewis, Conings.
 Luella Vernon, Elizabeth.
 Addie B. Black, Rupert.
 A. L. Gibson, Valley Point.
 John L. Wiseman, Fayetteville.
 Carrie M. Delabar, Huntington.
 Iva D. Cooper, Vandalia.
 Lewis R. McMillan, Good Hope.
 A. G. Smith, Morgantown.
 Hester F. Hayes, Glenville.
 Allen A. Moates, Wicklow.
 D. L. Barlow, Edray.....50.
 Thirty-nine of these were issued upon diplomas from the State

schools; two upon diplomas from the Peabody Normal College at Nashville, Tennessee; and the remaining nine upon diplomas from the denominational schools at Buckhannon.

I have the honor to be,

Your Obedient Servant,

ASHBY J. WILKINSON,

Secretary.

Report of Secretary, for 1898

Grafton, W. Va., Oct. 1, 1898.

Hon. J. R. Trotter,

State Superintendent Free Schools.

Charleston, W. Va.

Sir:—In accordance with the requirements of the statute governing the State Board of Examiners, I have the honor to transmit you herewith the eleventh annual report of said Board, for the year ending September 30, 1898.

Diplomas from the following schools in addition to those named in the statute, will be recognized in the issuing of certificates for the year ending September 30, 1899: Conference Seminary at Buckhannon in the County of Upshur; Salem College at Salem, and Broadus College at Clarksburg, in the County of Harrison; Burnsville Academy at Burnsville, in the County of Braxton; and Princeton Academy at Princeton, in the County of Mercer. Recognition was granted for one year only, and will not maintain after September 30, 1899, unless by future action of the Board.

The fees received during the year fall short of the amount of per diem and mileage due the Board.

Certificates were issued to the following persons:

FIRST CLASS

H. H. Winter, Harper's Ferry.

Addie Hay, Huntington.

C. Hartmeyer, Bruceton.

O. M. Haddox, Middlebourne.

James P. D. Gardner, White Sulphur Springs.

Lizzie Simms, Myerstown.

Annie B. Palton, Laurel Branch.
 Harvey Brand, Morgantown.
 Jennie M. Fleming, Fairmont.
 C. W. Boyd, Charleston.
 W. T. W. H. Griffith, Limestone.
 F. E. Jarvis, Camden.
 A. B. Cornwell, Dent.....13.

SECOND CLASS UPON EXAMINATION

H. S. Whetsell, Kingwood.
 K. E. Burke, Terra Alta.
 H. W. Barclay, Ronceverte.
 Lynn Waddell, Morgantown.
 Blanche P. Smith, Fayetteville.
 Stella White, New Martinsville.
 Vesta Denham, Lumberport.
 B. G. Moore, Ravenswood.
 C. A. Greene, Upland.....9.

SECOND CLASS UPON DIPLOMAS

R. D. Ice, Mannington.
 R. E. J. Campbell, Athens.
 R. F. Mason, Littleton.
 W. J. Pack, Lindside.
 M. E. Dixon, Ceredo.
 C. V. McClung, Hurricane.
 A. E. Chrislip, Elk City.
 Vadah Adkins, Huntington.
 E. B. Carlin, Hettie.
 M. M. Sims, Myerstown.
 Henry Carter, Rippon.
 Lizzie Sims, Myerstown.
 Lottie Brown, Farm.
 Clara A. Eiseman, Huntington.
 Hallie M. Swan, Middlebourne.
 Charles B. Hickman, Fairmont.
 J. D. Jones, Glenville.
 Willis H. Franklin, Adaline.
 Minnie A. Darlington, Jarrett.

Lilly S. Morgan, Rivesville.
 Walter J. LaFollette, Fairmont.
 Okey J. Woodford, Philippi.
 Dora F. Brown, Farm.
 Arthur P. Jones, Little Falls.
 R. J. McCommack, Lewiston.
 Laura F. Lewis, Aberdeen.
 Opha C. Lewis, Aberdeen.
 Emma S. Anderson, Bethany.
 Orie McConkey, Clarksburg.
 M. C. Lough, Fairmont.
 Mason C. Brackman, Ronceverte.
 William H. Wayt, Maud.
 Frank Cutright, Sago.
 J. H. Rohrbaugh, Audra.
 Elonzo T. Morgan, Buckhannon.
 John S. Jones, Baldwin.
 W. A. Stovall, Bluefield.
 H. A. Goodwin, Cherry Camp.
 Lillian D. Bender, Chapel.
 J. D. Muldoon, Morgantown.
 W. O. Woodson, Cashmere.
 Mary A. Straub, Clinton.
 Mary V. Anderson, Walkersville.
 C. A. Wade, Burnsville.
 Albert Heck, Rutherford.
 W. R. Gorby, Burnsville.....46.

Of these, thirty-four were issued upon diplomas from State schools, ten upon diplomas from the denominational schools at Buckhannon, and two upon diplomas from Burnsville Academy.

I desire in this connection, to call your attention to the significant fact that of the forty-six certificates issued upon diplomas during the year, not one went to a graduate of the State University; and of the fifty issued the preceding year, but one was upon diploma from the State University. Three or four of those who took the examinations were University graduates who did not wish to teach three years on a number one county certificate before receiving a State certificate. What stronger evidence is needed to establish the fact that the great majority of public school teachers of West Virginia never see a State University?

Every man familiar with the conditions of the public schools of the State is impressed with the supreme importance of higher education among the teaching fraternity. While our University is doing a great work for the State, it is doing but little along this line, and upon our State Normal Schools rests a great responsibility. They have been crippled very much in the past, but it is hoped our Legislature will be impressed with the importance of their mission, and give them a liberal appropriation.

Your Obedient Servant,

ASHBY J. WILKINSON.

Secretary.

List of Questions Used in 1898

ORTHOGRAPHY

1. Define: (a) Mute, (b) discriminative accent, (c) orthoepy, (d) semivowel.
2. State the four leading uses of silent letters. Illustrate.
3. (a) Name the letters that are never silent, (b) the letters that are always vowels.
4. Indicate by diacritical marks the sounds of the vowels and give the principle: (a) made, (b) sent, (c) miter, (d) care, (e) far, (f) aunt, (g) naught.
5. Define the following suffixes: (a) ing, (b) ful, (c) ness, (d) tide.
6. Parse orthographically—"oleomargarine."
7. State upon what principle the sounds of the following initial consonants depend: (a) gyves, (b) cite, (c) gone, (d) cake.
8. Give the principle on which the hyphen is used in each of the following words: (a) twenty-three, (b) light-blue, (c) half-dollar.
9. Illustrate three uses of the apostrophe.
(Omit one question.)

ART OF TEACHING

1. What have been your educational advantages? What experience in teaching have you had?

2. Is teaching properly designated as an Art? Give reasons for your answer.
3. Outline briefly your method of teaching Geography.
4. Write twenty lines or more, on the subject: "Advantages of the Compulsory School Law."

RHETORIC

1. What is the restrictive relative pronoun? Write three sentences using some other relatives to introduce restrictive clauses and give reasons for their use.
2. Upon what does the clearness of a sentence depend?
3. (a) Classify co-ordinate conjunctions. (b) Write sentences illustrating the various kinds of connections.
4. Define: Purity, Propriety, Precision.
5. State five ways in which structure may be varied.
6. What are the special properties of style?
7. Define metonymy. State the various relations giving rise to it. Illustrate by means of sentences.
8. Define: (a) Prosody, (b) a verse, (c) stanza.
9. Write fifty lines on subject to be given by examiner. Subject: "Justification of the war with Spain."

HISTORY OF WEST VIRGINIA

1. Name three citizens of West Virginia who were prominent in the movement for the formation of the State.
2. What can you say of the establishment of our State Educational Institutions.
3. Give account of some of the earlier settlements in what is now West Virginia.
4. Give the history of the location of the State Capital.
5. Name the governors of the State in the order of their service.

GRAMMAR

- (1) To us rulers look, and learn justice while they tremble; to us
- (2) the nations look, and learn to hope, while they rejoice. Our
- (3) heritage is all the love and heroism of liberty in the past; and
- (4) all the great of the Old World are our teachers. Our faith is
- (5) in God and the right; and God Himself is, we believe, our

(6) Guide and Leader. Though darkness sometimes shadows our
(7) national sky, though confusion comes from error, and success
(8) breeds corruption, yet will the storm pass in God's time, and in
(9) clearer sky and purer atmosphere our national life grow
(10) stronger and nobler.—George William Curtis.

The first six questions refer to the above selection.

Each of the following questions has ten credits assigned to it:

1. From the following clauses select those that are subordinate and state what each modifies: (a) They tremble (line 1). (b) Nations look (line 2). (c) Confusion comes (line 7). (d) Success breeds (lines 7-8). (e) Will storm pass (line 8).

2. Give (a) two modifiers of learn (line 1). (b) Three modifiers of heritage (line 3).

3. To what part of speech does each of the following belong: (a) While (line 2). (b) Himself (line 5). (c) Though (line 6). (d) Yet (line 8). (e) Stronger (line 10).

4. Parse great (line 4).

5. Give the syntax of (a) teachers (line 4). Atmosphere (line 9).

6. Classify as transitive or intransitive the following verbs: (a) Look (line 1). (b) Tremble (line 1). (c) Learn (line 2). (d) Is (line 3). (e) Believe (line 5).

7. Give synopsis of grow in all the tenses of the indicative mode, active voice.

8. Select an infinitive and give its syntax.

9. Give an example of (a) a verbal noun. (b) A collective noun. (c) An abstract noun.

10. Write a sentence containing a noun used independently by direct address (vocative). Write a sentence containing a noun in apposition.

ARITHMETIC

1. Reduce to a simple fraction:

$$\begin{array}{r} 8 \qquad 5 \\ \text{— of } 11 \text{ —} \\ 17 \qquad 12 \\ \hline 16 \qquad 3 \\ \text{— of } 9 \text{ —} \\ 34 \qquad 16 \end{array}$$

2. What is the exact value of $(3 \text{ plus } 2\frac{1}{2} - \frac{3}{4} \text{ of } \frac{6}{2} \text{ plus } 2\frac{4}{3} - \frac{1}{5})$

3. A and B together can do a piece of work in 12 days. If A can do only $\frac{3}{4}$ as much as B, how long will it take each of them to do the work?

4. A traveler found on arriving at his destination that his watch was 1 hour and 35 minutes too slow. In which direction had he been traveling? How far had he traveled?

5. A merchant sold a bill of goods for \$136.44, thereby gaining 20 per cent. What did the goods cost him?

6. Find the amount of the following with annual interest: (No interest having been paid.) \$1,825, for 5 years, 8 months at 7 per cent.

7. A hollow sphere whose diameter is 6 inches weighs $\frac{1}{8}$ as much as a solid sphere of the same material and diameter. How thick is the shell?

BOOK-KEEPING

1. State clearly the meaning of the following terms: Account, entry, debtor, creditor, posting.

2. Name the books commonly used in single entry book-keeping, and state the use made of each.

3. In what respects is book-keeping by double entry superior to that by single entry?

4. For what purpose is a cash account kept?

5. What must cash balance always equal? On which side of cash account is it entered?

6. If a debit entry is made as a credit entry in the day book, or vice versa, how is the mistake corrected? If in the ledger, how is the mistake corrected?

7. When may an erasure be made on books of account?

8. When and by whom should a bill of purchase be receipted?

9. Narrative: Sold to James Richards 25 yards of super-grain carpeting at 85 cents a yard; 6 square yards of floor oil cloth at $62\frac{1}{2}$ cents a yard; 98 lbs. of roller process flour at \$7.50 a barrel; 5 bushels of potatoes at 44 cents a bushel and $3\frac{1}{2}$ gallons of astral oil at 15 cents a gallon. Make out the bill.

10. Draw a negotiable note, requiring indorsement, at sixty days, for the amount of the bill in question 9, and properly receipt the bill.

BIENNIAL REPORT OF THE

PSYCHOLOGY

1. What is the advantage of the study of Psychology? What works on the subject have you read?
2. What is meant by perception? By intuition?
3. Upon what psychologic principle is object teaching based?
4. State the laws of Association.
5. What is the value of imagination? How may it be cultivated?
6. In what does moral training consist? •

ALGEBRA

1. Find the value of x in the following: $\frac{5-3x}{4}$ plus $\frac{3-5x}{3} = \frac{3}{2} - \frac{5x}{3}$
2. Find two numbers whose sum is 70, such that the first divided by the second gives a quotient of 2 and a remainder of 1.
3. A boy bought a certain number of apples at the rate of 4 for 5 cents, and sold them at the rate of 3 for 4 cents. He gained 60 cents. How many did he buy?
4. Find the value of the unknown quantity in the following:

$$5x \text{ plus } 6y = 40$$

$$8x - 4y = 4$$
5. A and B can perform a piece of work in 8 days; A and C can do it in 9 days, and B and C in 10 days. In how many days can each do the same work alone?

HISTORY OF UNITED STATES

1. What part of North America was explored by Sebastian Cabot? Ponce de Leon? Cartier? LaSalle? DeSoto?
2. Tell about the French and Indian War; Causes; Governor Dinwiddie's Message; Braddock's opinion of the American troops; Attempt to capture Fort DuQuesne.
3. Compare the French and English colonies at the beginning of the French and Indian war with respect to (a) unity of action, (b) number of settlers capable of bearing arms, and (c) possession of strategic points.
4. What was the nature of the difficulty along the Georgia and Florida border which Andrew Jackson was sent to settle in 1817?
5. Arrange the following battles in order of their occurrence: Monmouth, Long Island, Bunker Hill, Yorktown, Saratoga.

6. Describe two of the above battles, giving time, place, commanders, leading incidents and result.

7. Tell something important about James Otis, Thomas Jefferson, George Clinton, Eli Whitney, Francis S. Key, Charles Sumner, Samuel F. B. Morse, Harriet Beecher Stowe, Samuel J. Tilden, Frederick Douglass.

8. Explain any five of the following terms: Tory, Embargo, Missouri Compromise, State Sovereignty, Monroe Doctrine, Underground Railroad, Free Coinage.

9. Discuss the effect on the agitation of the slavery question of any two of the following events: Assault upon Charles Sumner, John Brown's raid, the publication of "Uncle Tom's Cabin," the Dred Scott decision.

10. Name three sources from which the United States acquired additional territory since their independence.

PHYSIOLOGY

1. Of what are the bones composed?

2. State some facts about the skeleton.

3. What is a joint, and how many kinds are there?

4. Describe the spinal column.

5. How does nature unite broken bones?

6. Mention the different tissues in the body, and give a brief account of each.

7. What are the muscles?

8. What is their characteristic property?

9. State difference between flexion and extension.

10. State difference between voluntary and involuntary muscles, and illustrate.

11. Of what importance is exercise?

12. Describe the skin.

13. Of what use is perspiration?

14. State what you can of bathing, and its importance.

15. Distinguish between organic and inorganic foods.

16. What proportion of the human body is water, and of what importance is it?

17. Describe the process of mastication and salivation.

18. The teeth, and what is necessary to preserve them.

19. What will be the result if the temporary teeth are removed too soon, and what if permanent, crowded teeth are not allowed sufficient space in the mouth?

BIENNIAL REPORT OF THE
PHYSICS

1. What is cohesion? adhesion? Explain the process of welding.

2. A body is acted on simultaneously by two forces at right angles to each other. The first is of value 120, the second 160. Find by diagram the direction and value of the resultant.

3. What is a machine? State general law of machines. A and B carry a weight of 200lbs. on a pole 4 feet long. The weight is one and one-half feet from end of pole held by A. What part of the weight does each bear?

4. State the law of fluid pressure. Give law of relation of volume and pressure of a gas.

5. Describe and explain the action of the common lifting pump.

6. How is sound produced? How transmitted? What is an echo?

7. What can you say as to the nature of light? How is the spectrum produced?

8. In what way may heat be diffused? Explain freezing mixtures, such as ice and salt.

9. How may electricity be generated? What is meant by volt? ohm? ampere?

10. What is a magnet? What is an electro-magnet? Sketch the lines of force of a single magnet as shown by sprinkling iron filings on a paper over the magnet.

READING.

Read to the examiners the first 21 lines of "Thanatopsis."

1. What is meant by "visible forms," line 2; by "various language," line 3; "healing sympathy," line 7; "embrace of ocean," line 21?

2. What figures of speech in the following expressions: "Their sharpness," line 8? "the last bitter hour," line 9? "narrow house," line 12?

3. Explain "stern agony," line 11; "all beholding sun," line 18.

4. What can you say of the author of this poem?

• CIVIL GOVERNMENT

1. Name and describe the three branches of our National Government, telling what composes each, terms of office, compensation, how selected, etc.
2. Do the same thing with our State Government.

SCHOOL LAW

1. Describe our compulsory school law.
2. What constitutes the legal qualifications of a school teacher?
3. Describe duties of (1) Board of Education; (2) trustee; (3) teacher; (4) parent as relates to school.

CURRENT HISTORY

1. Who are the Schley, Dewey and Hobson so much talked of? For what is each noted?
2. What is the present status of the war with Spain?
3. What is the strength of the American Army?
4. How many soldiers did West Virginia furnish?
5. What two ex-Confederates were Major Generals United States Army?
6. Who conducted the campaign in Cuba? In Porto Rico?
7. Who is now Military Commander in the Philippines?
8. Who signed terms of peace for Spain as set forth in the protocol? Who are the American Peace Commissioners?
9. What two illustrious men died recently?

GENERAL HISTORY

1. Tell something of each of the following: William of Normandy, Socrates, Luther, Drake.
2. Why was Napoleon whipped at Waterloo?
3. What was the secret of Hannibal's success? Wherein was Xerxes weak?
4. What was settled by the treaty of Ghent?
5. What caused the decline of civilization in Egypt?
6. What of Joan of Arc?
7. Who was England's greatest king? Why?
8. What was the Hundred Years' War?

GEOGRAPHY

1. Bound West Virginia, give its size and number of counties.
2. Say something of West Virginia's resources.
3. How large is Cuba? Porto Rico? Locate each. Where are the Philippines?
4. Where is Hawaii? What of its ownership and government?
5. What are the products of the several islands named above?
6. What are the relative sizes of Oregon and Georgia? France and California? Chili and Italy?
7. Why is Louisiana adapted to rice-growing? Georgia to water-melons?
8. Distinguish between tides and currents.

LITERATURE

1. What can you say of English literature and the English language previous to the time of Chaucer?
2. Give an outline of the life of Chaucer.
3. Give a quotation from each of the following: Addison, Tennyson, Bryant, Alice Cary, Lowell.
4. Name one of Shakespeare's tragedies; one of his comedies. Give an account of the writings of one of his contemporaries.
5. Sketch the life of Sir Francis Bacon. What was the influence of his works on philosophy.
6. Describe the character of Pope's literary work.
7. Give an account of the life and works of Addison.
8. Compare the writings of Dickens with those of Thackeray.
9. Give some characteristics of Tennyson's poetry.
10. Name the author and give some account of one of the following poems: (a) *Comus*; (b) *Ancient Mariner*; (c) *Rape of the Lock*; (d) *Childe Harold*.
11. Name a work of each of the following authors: (a) Gibbon; (b) Scott; (c) Byron; (d) Wordsworth.

Any two of the following branches:

GEOLOGY

1. What is Geology and what habit does it cultivate?
2. Explain the formation of soils.
3. Describe the formation of a glacier. State laws of motion. How does a glacier act as a geological agent?

4. Speak of the coal-fields of the United States. Discuss the origin of coal and of its varieties.
5. Give the evolution of the horse.
6. Give some of the connecting links of the animal kingdom.
7. Speak of the mammoth and cave-bear. Name some of their associates.
8. Discuss the age of man from the standpoint of Geology.

BOTANY

1. What are the essential parts of a plant, and what are the functions of each?
2. Compare an oak, a lilac, and a spire of grass, what differences do we observe in the stalk, and to what divisions do these differences give rise?
3. Comparing the leaf of an oak, a maple and a plantain, what differences do we observe?
4. Comparing the cross-section of a corn-stalk with that of a maple, what peculiarities do we notice? What do they indicate? To what classification do they lead?
5. Comparing the pine and the elm, what is the most striking difference; and what names are given to the classes which this difference indicates?
6. Mention five common evergreen conifers, and one that is deciduous.
7. Give examples of cryptogams, and describe the peculiarities of the class.
8. Describe some of the different means by which plants climb.
9. Mention some of the ways by which the flowers of plants are fertilized.
10. Give examples of changes in plants that have been caused by cultivation.

LATIN

Select some paragraph from Caesar or Virgil for translation. and have 6 or 8 words parsed.

DRAWING

Have applicant draw object or group of objects.

BIENNIAL REPORT OF THE
GEOMETRY

1. Prove the sum of the angles of a triangle are equal to two right angles.
 2. Prove the opposite sides of a parallelogram are equal.
 3. Prove the bisectors of the angles of a triangle meet in a common point.
 4. Construct a right triangle having given a side and the opposite acute angle.
 5. Given two angles of a triangle and the radius of the inscribed circle, to construct the triangle.
 6. If the angle A of the triangle ABC is 30 degrees, prove that the area $ABC = \frac{1}{4}AB \times AC$.
-

THE GENERAL SCHOOL FUND

The net amount of the General or "Distributable" School Fund for the year 1898, was \$382,819.36, that amount having been exceeded but once, in 1887, and then by only about six thousand dollars. This amount was derived from the following sources:

General School Tax on Real and Personal Property and Capitations..	\$ 354,698.12
Fines	9,733.69
Interest on State Deposits.....	13,532.57
Interest on Bonds held by Board of School Fund	17,980.03
Dividend on Stock held by Board of School Fund	11,240.00
Railroad Tax	21,000.39
Total	<hr/> \$ 428,184.80

From this amount must be deducted:

Salaries paid to County Superintendents	\$ 14,225.00
Salary State Superintendent of Free Schools	1,500.00
Salaries Clerks, Office State Superintendent	2,166.69
Salary Assistant Clerk, Office State Superintendent	700.00
Contingent Expenses, Office State	

BIENNIAL REPORT OF THE

Superintendent	1,536.30	
Printing and Binding, Office State Superintendent	3,327.62	
Traveling Expenses, State Superintendent	424.55	
Pay of Institute Instructors	1,000.00	
Loss by failure of Merchants Bank...	5,533.69	
Balance due counties for previous year	6,581.20	
Transfer of balances in Sheriff's accounts	7,486.45	
Overpaid Taxes	493.94	
Erroneous payment of Interest on Bonds	390.00	
Total		\$ 45,365.44
Leaving a net amount of		\$ 382,819.36

This was distributed to the several cities and counties as required by law, each being entitled to \$1.2565173 for each pupil enumerated. The following table shows the apportionments for the last two years:

APPORTIONMENT OF THE GENERAL SCHOOL FUND FOR 1897 AND 1898.

Counties	1897.	1898.
Barbour	\$ 5,262 62	\$ 5,674 43

1894	367,377 18	13,737 50	353,639 68
1895	392,654 32	13,787 50	378,866 82
1896	395,020 17	14,025 00	380,995 17
1897	364,982 22	14,137 50	350,844 72
1898	397,044 86	14,225 00	382,819 86

THE SCHOOL FUND

During the time the Constitutional Committee was in session unusual interest was aroused in the so called Irreducible School Fund because it was proposed by some of the members of that Committee to distribute the amount of the fund already accumulated to the different counties in the State, there being almost as many plans and purposes of distribution by each county as there were members of the Committee. Fortunately, it would seem, wiser counsel prevailed and no amendment was proposed providing for the distribution of this fund which for some years has steadily grown at an average rate of from \$35,000 to \$40,000 per year, so that it now amounts to over \$924,000. The greater part of this as the accompanying table will show has been invested by the Board of the School Fund, composed of the Governor, State Superintendent of Free Schools, Auditor and Treasurer, in stocks, bonds, and other interest bearing securities, the most of which pay six per cent. though some pay as low as four per cent. That part which is not so invested is deposited in certain banks known as State depositories and draws three per cent. interest payable quarterly. The interest from these various sources which amounted during the last year to 40,967.70 dollars, goes to the General or "Distributable Fund" and is apportioned to the counties of the State in proportion to their school population.

The additions to The School Fund for each of the past six years were as follows:

1893.

From sale of forfeited land	\$	954.47
From redemption of land, Auditor's		
Office		5,023.40

DEPARTMENT OF FREE SCHOOLS

87

From sale of delinquent land	1,449.63	
From redemption of land forfeited ..	1,137.07	
From sale of waste and unappropriat- ed land	586.59	
From tax on premiums	17,595.31	
From tax on gross receipts from Tele- graph companies	408.78	
From tax on receipts from Express companies	477.47	
From sale and redemption of forfeit- ed lands	53.61	
Total		\$ 27,686.33

From this must be deducted:

For publishing list of delinquent lands	\$ 90.02

LIBRARIES

Although no special or systematic attempt has been made to establish school libraries, during the last two years the State Superintendent of Free Schools has inserted in the institute programs a special topic on School Libraries and through the columns of the West Virginia School Journal, has repeatedly exhorted the teachers of the State to give unpretentious entertainments, participated in only by pupils, for the purpose of raising small sums of money which could be used in the purchase of books, and for the additional and equally important purpose of increasing interest in the schools and in public education generally. The results, as shown by the increased number of libraries and the increased number of volumes, is far beyond the hope of the most sanguine. In 1897 the number of schools having libraries was 594 and the number of volumes in these libraries was 8,026. In 1898 these numbers had grown to 1,131 and 13,448 respectively, an increase of almost one hundred per cent. in the number of libraries and of over sixty-five per cent. in the number of volumes. These numbers may seem small for 5,840 schools and for an enumeration of over three hundred thousand pupils, but if the phenomenal growth of the last year continues, at the end of three years every school in the State will have a library of, on an average, almost twenty volumes. Twenty volumes makes but an insignificant collection of books, but that number will gladden the hearts of every boy and girl in a country school during the long winter evenings of two or three years, and in the meantime, when a beginning, no matter how insignificant, is made, the interest of patrons and pupils will be so aroused that, in most instances, the libraries will continue to

grow faster than the brightest pupil can read and digest the new books.

Libraries once considered luxuries to be had only by the rich and to be used only by the idle, are now regarded as necessities to the rich and poor alike. The State by act of Legislature has decreed that it shall be a crime to deprive a boy or a girl of a common school education; it might go farther and decree that after children have been taught to read it shall be a crime not to supply them with pure, wholesome, invigorating books. The public schools save many a child from disgrace and crime by teaching him the duties and the possibilities of life, but they would save many more, if, by putting good books in their hands they kept them from devouring, by the thousands, the so-called "blood and thunder" novels which are ever before their eyes and which appeal to them because of their insignificant cost and because they can get no others. And this can be done without any difficulty if the Boards of Education, instead of purchasing cheap, worthless charts, which, at least in the hands of inexperienced teachers are of no practical value whatever, will use the money thus saved in the purchase of books for the school libraries. This does not mean that all charts are worthless or that the Boards of Education should refuse to buy any charts whatever, but it means that it would be far better to purchase good, wholesome books with this money than to buy charts indiscriminately as many of the Boards of Education have done in the last few years. It would certainly be advisable indeed for the Boards of Education to go a little farther and set aside annually a small amount from the building fund for the purchase of a few books for the schools. They should exercise great care, however, in designating a person or persons to select the books. Ordinarily the teacher will be best fitted for that, but sometimes her list should be reviewed, and revised, if necessary. The most frequent and perhaps the worst mistake made in purchasing books is in selecting those not suited to the age of the pupils who are to use them. Fox's Book of Martyrs or Fuller's Church History are good books in their place but one would hunt a long time before he would find that place in the library of a country school where children were the only readers. On the other hand an equally bad mistake may be made in selecting books intended for very young children. Fortunately there are some books suited to almost all

ages and tastes. Several of these should find a place in every library; as for instance—"Little Lord Fauntleroy," "Little Women," "Ivanhoe," and "Scottish Chiefs." Indeed with proper care and good common sense a very satisfactory collection, with something that will please and benefit every pupil, may be secured for a very moderate sum. If a school by two or three small entertainments would raise ten or fifteen dollars, and the Board of Education would donate a like amount a very respectable beginning could be made. If any suggestive lists or any information about the purchase of books is desired, the State Superintendent of Free Schools is ever ready to give any possible assistance.

As teachers should be enthusiastic in every effort to educate the people it will not be amiss to say something in this connection about public libraries, the main purpose of which is to do for the older people what schools and school libraries do for the young. That a good collection of books, in fact a choice library, can be established and maintained by any small town has been shown by a town of scarcely a hundred inhabitants in the interior of the State. To start the library, in this case, ten or twelve persons of the town united and paid a dollar membership each. These persons then solicited other members until now the total membership has reached perhaps seventy-five. To those who are not members books are rented at five cents a week. By these means and by donations, a choice library of about five hundred volumes has been established and is in constant use. Several other towns in the State have made a like attempt but have met with disastrous failures, simply because the library associations were organized to purchase a complete library offered by some plausible agent. They secured in this way a half dozen good books but to get them they took several hundred that were scarcely worth storage room. No town or committee should purchase these ready made libraries. The only safe and sensible way is to purchase the books wanted where they may be had on the best terms, and then add to these as there is a demand for something else. If the purchase of books continues at short intervals, the tastes of the readers can be consulted, and, what is far more important in the beginning, the interest of the public will not flash up and then die out, but will continue and will grow.

The traveling library, such as Wisconsin, at the expense of the State, has established and maintained with wonderful success, would be better in many respects than the school or town library and, in time, there might be the additional advantage that they would be available for even sparsely settled parts of the State. The Wisconsin plan would perhaps need some modifications before it could be carried out successfully in West Virginia, but in the main there need not be any essential difference. This system, as is well known, would consist in the purchase by the State of a number of different collections of from fifty to a hundred volumes. Each collection would be sent in turn to each town and would be left two or three months, or until read, and would then be forwarded to the next town, another collection being sent to take its place. In this way all the towns would have the advantage of a very large number of books at comparatively small cost to the State.

But until the State comes to the rescue with traveling libraries the time should be improved by the teachers in working up a strong sentiment in favor of school libraries and in establishing them. The opportunities in this work are so great and the prospects for success so favorable no teacher should shrink from what seems to be his duty on account of the possibility of hard work and the apathy of the people.

THE NORMAL SCHOOLS

For many years there has been a persistent demand from the school men of the State that the courses of study in all the schools, from the highest to the lowest, should be so modified that each would not be a system entirely apart by itself, but that all would be interdependent and that there would be a steady graduation through which any student might pass without interruption from the lowest seat in a primary school to graduation in the most advanced courses offered at the West Virginia University or at any other university. But it was not until 1897, thirty years after the founding of the State Normal School and the West Virginia University that it was possible for a student to take this complete course at a public school without entering the preparatory department of the University to fit himself for the freshman class.

In April, 1897, the Board of Regents of the Normal Schools, consisting of the State Superintendent, who is ex-officio president, Harvey W. Harmer of Clarksburg, George W. Johnson of Martinsburg, Robert S. Carr of Charleston, and Waitman Barbe of Parkersburg, adopted an academic course of study which articulates, on the one hand, with the course of study provided by the State Superintendent for the primary and graded schools, and, on the other, with the course of study laid down for freshmen at the University, being, in fact, the course of study followed in the preparatory department of that institution. This, to be sure, is not as complete a unification as will be secured by the adoption of the high school course of study advocated in another part of this report and is not nearly so desirable, unless the Normal Schools soon cease to be called normal schools and begin to be

called, more correctly, academies or preparatory schools. To some this may seem a strange statement, but it will not seem so strange as the equally correct one, that there is not in this State a single normal school, or a school that attempts to do the work of a normal school. The schools, which are called Normal Schools, give academic instruction without any attempt at the training of teachers. True normal schools have training departments in which all students must spend much of their time in actual training under the careful supervision and direction of a skilled training teacher. To these schools students go, not to acquire the elements of an education, but, having graduated at a reputable high school or college, to be trained as teachers. The fact that normal schools are greatly needed, however, cannot be advanced as an argument against secondary or preparatory schools, for there is as much need of the latter as of the former. It would not be wise, therefore, to abolish the present so-called normals and build up in their place schools simply for the training of teachers. That would be going from one extreme to the other.

The plan advocated by the Governor of the State in his inaugural address would perhaps be a happy solution of the difficulty. This plan was to continue five of the present Normal Schools as academies or preparatory schools and to change the sixth into a genuine up-to-date normal school, which would admit only such students as have taken a course, at least, equal to that offered by the other five schools. Only two objections to this plan can be advanced. The one is that the friends of each of the schools would insist that their own school should be the favored one. The other is that there are no well prepared training teachers in the State; such, for instance, as are employed at the Normal Schools at Bridgewater, Massachusetts; Oswego, New York; or Chicago, Illinois, and it would be difficult to get a Board of Regents of whom three, a majority, would dare to disregard the demands of the populace that every teacher employed in every State institution shall be a resident of the State.

Loyalty to one's state or nation is an essential part in the make-up of every true man, but in a case like this, where a citizen wraps the majesty of his statehood about him and declares that for West Virginia no other teachers are so good as West Virginians, his patriotism has degenerated to clannishness which should not be allowed to obstruct the educational progress of

the State by preventing the establishment of a great Normal School. This work would be entirely new, no citizen who is available has had any experience in it, and if it is to be undertaken with any prospect or possibility of success, it must be undertaken by teachers, a large part of whom will come from other states.

This is a condition of affairs to be regretted, but no amount of regretting, or denial by persons unacquainted with the facts will suffice to change it. The sensible way is to accept it with the best possible grace and to hasten to bring about a new condition which fortunately could soon be done, for, with the proper training teachers, the new normal school would easily supply all the skilled teachers needed.

But the high school course has not been adopted, the proposed normal school has not been provided, and the Normal Schools are not normal schools. Consequently the Board of Regents, with little else to do under the circumstances, added some Latin, Greek and mathematics to the old academic course and now there are, in various parts of the State, schools preparing boys and girls to enter the University on an equality with those prepared at that institution. This causes, to some extent at least, a conflict between the interests of the University and the interests of the Normal Schools, which in times past, became so serious, it is charged, that some of the Normal Schools openly fought the University and led their students to believe that the course of study at the Normal Schools was as thorough and extensive as that at the University. Fortunately that state of affairs does not now exist though the disturbing factor still remains. That factor is the preparatory department of the University which the principals of some of the schools think is drawing students from their legitimate territory. That this is done is clearly proved since the opening of that department to women, by a large decrease in the number of female students at the Fairmont Normal School. In other words, the Normal School authorities believe that inasmuch as the main purpose of the State University, or any university, is to afford facilities for higher education, her energies should not be dissipated by attempting secondary education, for which the Normal Schools were established.

But for the most part, all concerned recognize that each has its own field and that the one is dependent on the other; the Univer-

sity must look to the Normal Schools for well prepared, healthy, vigorous, students; the Normal Schools must look to the University to take the Normal School graduates and to make of them well rounded, manly men and womanly women. The failure of either reflects on the other. Moreover, by the reciprocal workings of these two parts of our educational system, the third part, consisting of the common or graded schools, is greatly benefited by a better class of teachers to whom the Normal Schools give an impetus to teaching, and the University a thorough education.

Since the completion of the new building at West Liberty in the spring of 1897, and that at Concord in the fall of 1898, every school is supplied with new, modern, and commodious quarters, which, with one exception, will accommodate the steadily increasing number of students for several years to come. The Legislature has been liberal in the past in making appropriations for these new structures and now, since there is no further need of appropriations for that purpose, it is to be hoped that this same liberality may be shown in increased appropriations for the salaries of teachers and for additions to the libraries. In 1873 the amount allowed for teachers was \$11,500. In 1898, with almost three times as many students, this amount has been raised to only \$19,200. This amount should be increased now to at least \$25,000 or the efficiency of these schools must be greatly impaired. The libraries have not fared better. Although some of them have been growing for thirty years, their growth has been so laborious that not more than two out of the six can now boast of over one thousand volumes, many of which are so old that the theories advocated within their moth-eaten covers have been almost forgotten. An appropriation of \$1,000 per year for each library would not supply the books these schools should have.

The attendance at all the schools has grown almost steadily since they were founded, there being enrolled, in the aggregate, during the past year, 1,406 students. The instructors, who, by order of the Board of Regents are now known as Principal, First Assistant, and Assistants, are as follows:

MARSHALL COLLEGE NORMAL SCHOOL

L. J. Corbly, Principal. Greek, Latin, Psychology and Pedagogy.

W. H. H.

DEPARTMENT OF FREE SCHOOLS

101

Mrs. Naomi Everett, First Assistant. Rhetoric, Literature and History.

Miss Lilian Hackney, Latin and Natural Science.

Miss Mary Mckendree, Mathematics and Economics.

Miss Cora Trice, English, Latin and Civics.

Miss Mabel Brown, History of Education and Training Department.

FAIRMONT NORMAL SCHOOL

J. Walter Barnes, Principal. Psychology, Pedagogy and Ethics.

John G. Knutti, First Assistant. Sciences.

Joseph Rosier, Classics.

M. C. Lough, Mathematics.

Roy Reger, History and Economics.

Miss W. O. South, English.

Mrs. Mabel Henshaw Gardiner, English and Mathematics.

CONCORD NORMAL SCHOOL

George M. Ford, Principal. Psychology. Ethics, Economics and Greek.

James F. Holroyd, First Assistant. History and Civics.

Lorain Fortney, Latin and Sciences.

J. L. Sydenstricker, English, Latin and Mathematics.

Miss Mollie Va. Smith, English.

GLENVILLE NORMAL SCHOOL

W. J. Holden, Principal. Psychology, Geology, Pedagogy, and Latin.

John Nuzum, First Assistant. Physics, Literature, Civil Government and Botany.

Manton M. Scott, Mathematics and Physical Geography.

Miss Pearl C. Hosie, General History, Zoology, and English.

SHEPHERD COLLEGE NORMAL SCHOOL

A. C. Kimler, Principal. Psychology, History of Education, Pedagogy and Economics.

Charles J. Miller, First Assistant. Mathematics, Physics, and Chemistry.

Miss Harriet D. Johnson, Latin, Greek, and Zoology.

Miss Mary E. McConn, History, Rhetoric, English Literature,
and Botany.

WEST LIBERTY NORMAL SCHOOL.

W. B. Cutright, Principal. Latin, Economics, and History.

Miss Callie Curtis, First Assistant. English and Elocution.

J. C. Shaw, Pedagogy and Ethics.

S. S. Jacob, Science and Mathematics.

INSTITUTE RESOLUTIONS

To anyone engaged in making up a list of the needs of the educational system, the well defined opinions of those engaged in practical teaching should be of much importance, for they show from the different standpoint of different teachers wherein each teacher sees elements of strength and elements of weakness. Though it is not always true, yet as a general thing, the institute resolutions give a clear indication of the sentiments of the body of teachers for a county. It seems advisable, therefore, to insert such resolutions as have been received at the Department of Free Schools, the unimportant or local resolutions being omitted. A careful examination of the resolutions which follow will convince any fair minded reader that the teachers of the State are in earnest when they demand that the present unsatisfactory system of county examinations shall be superseded by a uniform system. The opinion is almost as strong also in favor of a more rigid compulsory attendance law than the one now in force.

Institute Resolutions

BARBOUR COUNTY

Resolved, That we commend the Legislature for enacting our present compulsory school law and ask that such amendments be made thereto as will secure the further efficiency of the same.

That, while we prefer State uniformity in text books to the ex-

isting county system of adoption in this State, we disapprove any legislation abolishing the county adoption system prior to the expiration of the five year contracts made under the existing law, as it would tend toward involving school patrons in unnecessary expense and produce confusion in the class work of the school room.

That it is the duty of every teacher to devote a portion of his time in school to the reading of the Bible and the singing of religious and patriotic songs and that we will exert our influence to elevate the moral tone of society by assisting to place men in office whose lives are worthy the imitation of the youth of our country.

FAYETTE COUNTY

Whereas, Our present school-law has been amended and re-amended, so there now exists much confusion on account of contradictory clauses:

Therefore be it resolved by the teachers of Fayette County that our present school-law be entirely revised with the following clauses introduced, namely:

(a.) That in order to secure better supervision of country schools the county superintendent's salary be increased sufficiently to enable him to devote his entire time to the interests of the schools.

(b.) That we favor uniform examinations for teachers.

(c.) That the unit of taxation, for school purposes be the State instead of the district, as at present.

(d.) That we favor the distribution of part of the school fund among the schools of the State.

That we heartily commend our last Legislature for enacting the compulsory school law, and that we ask our next Legislature to so amend the law that an offense shall consist in a pupil's failing to attend the school any day within the first sixteen weeks of the term, without legal excuse.

GILMER COUNTY

Be it Resolved, That we favor a uniform set of examination questions throughout the State.

That we heartily endorse the present efficient management of

the West Virginia School Journal and promise it our support.

That we commend our fellow teachers who have enlisted in the army for their zealousness and patriotism in behalf of our nation and that we extend to them our best wishes and bid them God speed.

GREENBRIER COUNTY

That it is the opinion of this institute that it will give more general satisfaction and free our county superintendents and boards of examiners of unjust criticism to have uniform examinations throughout the State; and therefore that we request our next Legislature to enact laws providing for such a system.

That we favor uniform text-books throughout the State and the appointment by the Legislature of a State Book Board composed of the State Superintendent and the Principals of the several Normal Schools.

That the teachers of Greenbrier should receive a better salary in order that they may do better work; also that the school term should be lengthened.

HARDY COUNTY

Resolved, That the State be the unit for school organization, the salary of teachers uniform, and the term be extended to seven months.

That after a teacher has taught ten years on a No. 1 certificate, he be exempt from further examination; and that no person be permitted to teach who has not attained the age of eighteen.

That the compulsory attendance act should be amended by changing the five days to two days, and that the excuses considered sufficient in the eyes of the law for non-attendance, be more clearly set forth.

HARRISON COUNTY

Be it Resolved, That the Legislature should instruct the Department of Education of the State to provide a uniform system of examinations for the State.

That in the present compulsory attendance law we recognize a step in the right direction and hope for such further legisla-

tion as will make it thoroughly efficient in enforcing the attendance of the school youths of the State.

That under the present compulsory attendance law, which we believe will speedily be made more efficient, we deplore the present text-book law. We believe it just and right that the State furnish free text-books to all pupils and that those text-books should be uniform throughout the State.

That we believe our institutes would be productive of better results and there would be less inclination on the part of the teachers to absent themselves from the sessions, if they were held in session two weeks and the teachers allowed a compensation for their attendance. We would recommend that classes be organized and conducted largely by teachers themselves to illustrate and bring out means and methods.

That we are sensible of the great loss to our profession in the death of our fellow teacher, Henry C. Robinson, who was one of the most proficient and progressive teachers and we trust other teachers will emulate his admirable principles.

LEWIS COUNTY

We are heartily in sympathy with compulsory attendance, and recommend amendments to our present law making it an offense to be absent on three successive days and defining so explicitly the duties and liabilities of parents, guardians, trustees, teachers and justices, that the law may be effectively enforced.

We favor an appropriation by the Legislature not to exceed \$25, to each county, to pay expenses of county superintendent in his official correspondence.

We endorse the graded system for public schools, and pride ourselves on the successful application in our county, and believe that free text-books would add materially to perfecting the application of not only this system but also of the compulsory attendance.

We believe examinations for teachers' certificates should be uniform throughout the State and that No. one certificates should be good in every county within the State. We therefore favor the preparation of the questions by a state board of examiners, who shall send the questions under seal to the county superintendent to be opened in the presence of the teachers after they are assembled for examination. Examinations shall be

held at the same time throughout the State and salaries for teachers should be uniform.

Recognizing the tendency of the public to disregard the dignity that should be attached to the title "Professor," and the weakness in our law which permits schools of inferior grade to grant college degrees, we condemn the indiscriminate use of the above title as tending to degrade higher scholarship; and ask that our laws be so amended that college degrees can be bestowed only by high grade colleges.

LINCOLN COUNTY

Be it resolved, That the right of suffrage be extended to women in all elections pertaining to the school work of the State.

That the act known as the Compulsory School Law be amended so as to make it more explicit and effective, and that the clause which reads from "8 to 14 years of age," be changed so as to read from 7 to 16 years of age.

That we oppose the distribution of the Irreducible School Fund as proposed by some of the people of the State.

That county examinations be made uniform throughout the State, and that the questions be prepared by the State Superintendent of Free Schools.

That a law be enacted making the county the unit, creating a County Board of Education, composed of one member from each magisterial district, with power to employ a county superintendent, who must be a graduate from some reputable school, and whose compensation shall not be less than \$600.00 in any county.

MERCER COUNTY

Resolved, That we favor a system of uniform examinations and uniform taxation, for school purposes, throughout the State.

That it is the sentiment of the teachers of Mercer county that the selection of text-books for the schools should be placed in the hands of the State Board, and that a uniformity of text-books be arranged, and further, that we endorse Harvey's grammar as a suitable text book for use in the public schools.

That the thanks of the teachers of this institute are tendered to the members of our Legislature for the present mild and partial-

ly efficient compulsory school law; and that we request the incoming Legislature to make only such modifications of the present law as will make it more clear, and that copies of this resolution be forwarded to the senators of this Senatorial district and to the next member of the House of Delegates from this county.

MONROE COUNTY

Resolved, That we, the teachers of Monroe county, recognize the value of institute work; and we believe that the law requiring attendance should be strictly enforced.

That we favor the establishment of a State School Book Board instead of our present county Boards.

That we request our next Legislature to change the school law so that the minimum salary for teachers holding State certificates shall be \$35 per month.

That we favor uniform examination questions prepared by a State Board of Examiners, and that certificates be valid throughout the State.

That there should be a Teachers' Relief Fund provided by our State for the benefit of superannuated teachers who have devoted fifteen years to the profession and who have no other means of support.

MCDOWELL COUNTY

Be it Resolved, That the next Legislature be asked to make the present compulsory school law more effective and that the teachers be compelled to report under the compulsory law to trustees only.

That it is the sense of this Institute that the next Legislature of West Virginia be requested to pass a law that the minimum salary of teachers holding No. 1 certificates shall not be less than \$40 per month, and Nos. 2 and 3 in proportion.

That the trustees shall receive \$5 per annum for their services provided they pay a monthly visit to the school of their district.

That as a number of the states have adopted the plan of hoisting the National colors over the public schools, and as the State of West Virginia is as patriotic as any state in the Union, the State Legislature be requested to pass a law requiring the National colors to be hoisted over every school house during the session of said school.

That, we the teachers of McDowell county ask out next delegate to the West Virginia Legislature to embody these resolutions in a bill and present it to the next Legislature for its consideration and use all the honorable means in his power to secure its passage. And, resolved, further, That should the said delegate neglect or refuse to present the said bill, that we as a body, will so remember him in the future.

PRESTON COUNTY

Resolved, That inasmuch as the compulsory school law has proved beneficial to the schools of the State, wherever enforced, we use every effort to secure legislation increasing its efficiency.

That the best interests of our schools demand a law for uniform examinations of teachers throughout the State, and that the teachers of this county encourage all reasonable efforts tending in that direction.

That, inasmuch as the present state school levy is inadequate to run the schools of the State more than five months, that we demand the next session of the State Legislature raise the levy for State school purposes from ten cents to fifteen cents, and that the minimum school term be six months.

PUTNAM COUNTY

Be it Resolved, That we appreciate the beneficial effects which the compulsory attendance law has already produced but we believe it should be so amended as to contain a provision creating truancy officer with the authority to supply books and clothing to those who are not able to buy them.

That the law be so amended that the teachers receive credit on their term of school for as many days as they attend the institute.

That we, as teachers of Putnam county, organize ourselves into an association for mutual benefit and petition the county superintendent to become president of the association.

RALEIGH COUNTY

Be it Resolved. That we recognize the present compulsory attendance law as a beneficial one, but we would recommend that

the next Legislature so amend the present law as more fully to carry out the principles embodied in the law.

That the next Legislature should make it clear by legislation how the costs of justices and witnesses should be paid in cases arising under the compulsory law when the parties charged with violating the law are acquitted.

SUMMERS COUNTY

Be it Resolved, That we commend our Legislature for giving us our present Compulsory School Law, and we ask that it be so amended as to relieve the teacher of the necessity of informing against pupils, and also to so amend it that it cannot be petitioned down in any sub-district in the State.

That we recommend that the State school levy be raised to twenty (20) cents on the hundred dollars valuation, also a uniform system of State examinations, and that the minimum salary of persons holding a No. 1 grade of certificate be \$50.00 and No. 2, \$35.00, and that we abolish the No. 3 grade entirely.

That we recommend an equal distribution of the railroad tax among the various districts of the county.

That teachers should receive pay for attending institute the same as for teaching.

TAYLOR COUNTY

Be it resolved, That we earnestly request our Legislature at its next session, to enact a law to make the office of county superintendent more effective by giving that officer authority over the teacher with regard to school management and methods of teaching, and that the salaries be made such as to justify him in devoting his entire time to the duties of his office.

That we urge upon the Legislature the necessity of appropriating a sufficient amount to make the plan of our Annual Institute more efficient, by procuring the best talent obtainable as instructors; and that we respectfully ask our State Superintendent to mail the programs to the individual teachers not later than the first of May, with the suggestion that the teachers prepare themselves to assist in carrying out the program by formulating requests for the presentation of such topics as are especially useful to their individual needs.

That as teachers we heartily endorse the district institutes and would ask the co-operation of the district officers and the patrons of the schools to make them instructive and profitable to each teacher and a power for the bettering and up-building of the schools throughout the county.

That we are heartily in favor of establishing libraries in all of our public schools and will put forth our best efforts toward this end, believing that great benefit will be derived therefrom.

TYLER COUNTY

Be it Resolved, That we favor a system of uniform examinations throughout the State.

That we disapprove of normal schools taught by county superintendents, but favor the increase of their salaries so as to render them independent, and able to devote their entire time to the counties under their care.

That we favor the movement inaugurated at the last meeting of the West Virginia Educational Association, looking toward the establishment of a retirement fund for worn out and disabled teachers, and that we will do all in our power to make it a success.

That we endorse the compulsory school law, and recommend such legislation as will make it effective throughout the entire term of school in any district.

UPSHUR COUNTY

Resolved, That the present method of county superintendence is ineffective and fails in its purpose, therefore, we favor a system of district supervision, essentially the same as city superintendence; and we believe that district superintendents should constitute a county board of education.

That it is the sense of this Institute that we favor the establishment of the uniform examination system throughout the State.

That the efficiency of the teacher's work, and not the grade of certificate, should govern the wages paid.

That the county be made the unit of taxation for school purposes.

That our present school book law is detrimental to the best in-

terests of our schools and should be abolished or so amended as to give us State uniformity.

WAYNE COUNTY

Be it Resolved, That the school text-books be selected by the State instead of the counties.

That the appointment of a depositary by the board of education be compulsory instead of optional.

That the board of education buy school books for the children whose parents or guardians are too poor to buy.

That the county superintendent be prohibited from teaching.

That the trustees of each sub-district be elected by the people of each sub-district instead of being appointed by the board of education.

That the law allowing No. 3 certificates be abolished.

That the State board of examiners prepare a uniform set of questions for each county examination.

WEBSTER COUNTY

Be it Resolved, That we have a uniform system of examinations throughout the State and that certificates granted in one county be valid in any county in the State.

That we have a uniform State School Tax.

That we advocate a more stringent compulsory attendance law.

That county superintendents and members of the board of examiners should not be allowed to teach schools where teachers prepare to pass examinations.

WETZEL COUNTY

Resolved, That we are in favor of a more thorough and rigid compulsory school law.

That we have uniform examinations, and that certificates be valid throughout the State.

That the school elections be held separate and apart from our State and national elections, and that women be allowed to vote in the election of school officers.

That we favor the plan being inaugurated in our State for a retirement fund for teachers who are forced to leave the profes-

sion through disability or age, and we will do all in our power to make it a success.

PROMPT PAYMENT OF TEACHERS' SALARIES.

As far back as 1873, the State Superintendent of Free Schools in his Biennial Report commented upon the trouble teachers were having in several counties of the State in securing the prompt payment of their salaries by the county sheriffs, and from that time to the present each succeeding superintendent, had he given way to his indignation, might easily have doubled the size of his report in expressing his feelings about this great injustice. Like the poor teacher, it is always present, and as long as it is allowed to continue the teacher must continue poor. It is presumed that in any occupation the laborer is worthy of his hire and should receive it just as soon as it is due. Though there may be exceptions, this is especially true of teachers. But instead of getting their hire when it is due, in many counties in the State they must either wait months or else must take their order to some curb-stone broker operating, the teachers have no hesitancy in saying, in conjunction with the sheriff and receive from him perhaps two-thirds or three-fourths the face of the order. This corrupt practice became so general that in 1873 the Legislature sought to protect the teacher by the passage of the following: "Upon the failure of such sheriff to honor any proper draft which may be drawn by the said board of education upon him, judgment upon motion thereof may be obtained before any justice of his county, or before the county or circuit court thereof, he having had at least ten days' notice of the motion." But even this, it seems, was not sufficient and in 1891 the following amendment was added after the words "may be drawn by the

said board of education upon him," "The person entitled to receive the sum of money specified in such draft may require the sheriff to endorse thereon, or write across the face thereof the words, 'presented for payment,' with the proper date and sign the same; and judgment upon motion therefor, may be obtained against the sheriff before any justice of his county, or before the circuit court thereof, with interest from the time said draft was presented and ten per cent. damages, he having at least ten days notice of the motion; Provided, That no sheriff shall be required to endorse any school order, nor shall suit be brought on any such school order, prior to the first day of November of the current school year."

But judging by the almost innumerable number of complaints that are made to the State Superintendent of Free Schools and the requests for aid, which he is powerless to give, the amendment is not sufficient. Teachers complain that sheriffs will not pay their orders when due and that many of them refuse absolutely to endorse them as the law provides. Under the circumstances the overworked and underpaid teacher has but little choice. He may institute legal proceedings, but he considers it cheaper and safer to get his orders discounted, whatever the discount may be. Consequently such sheriffs as are in the habit of doing this, in a short time, begin to feel perfectly secure in this method of adding to the perquisites of their office.

It is easily seen that if this corrupt practice prevails many of the best teachers will be compelled to seek more remunerative employment or at least to seek employment where they will receive their salaries without giving a large part of them to paper shavers, and the schools will lose their services. As a matter of simple honesty and justice this practice which probably enriches not more than half a dozen sheriffs and can enrich only fifty-five, but can almost impoverish more than six thousand teachers, should be stopped and stopped now. To stop it may mean to change entirely the system of collecting taxes and paying orders. It may mean the complete divorce of financial affairs from the office of sheriff and the creation of the office of county treasurer. But whatever it means, justice, honesty, integrity, the success of the school system of the State demand that it shall be done, and done now.

THE WEST VIRGINIA UNIVERSITY

The friends of the University, and all the citizens of the State are its friends, rejoice at the renewed prosperity of that institution as shown by its wonderful growth. The catalogue, for the year ending in June, 1898, and the report of the President to the Board of Regents show an increase in the number of students of almost, or quite fifty per cent. over the previous year and of more than two hundred per cent. over the year 1890. But there has been in the same time a more significant growth, a growth that means more to the educational world, that will have greater weight in making the University influential and permanent than any increase in the number of freshmen or seniors. That growth is in the number of instructors and courses of study. It is even more. It is in the number and kind of instructors and courses of study. Mere numbers, whether of students, teachers or courses of study, convey but little information or give but vague ideas about the kind or quality of work done. A thousand students and a hundred instructors would not necessarily make more than a preparatory school, and it might be a very poor one at that. But a corps of earnest, scholarly instructors who give the most advanced courses in language, literature, and science, with good libraries and laboratories for original investigation, even though there be but a handful of students, might constitute a great university. No one familiar with such affairs and entirely unbiased, however, would pretend to say that the West Virginia University is not a great institution to be ranked with the half dozen great universities of the country. But he would be entirely justified in saying that its wonderful growth, in various

ways, during recent years, indicates almost conclusively that there have been laid the foundations of such an institution and that in time, with the loyal support of the citizens of the State, the University will easily become one of the educational centres of the country. It should be remembered, however, that a great university, even with unlimited resources, cannot spring up like a fungus without being a fungus, and that stability and durability come only with the lapse of time.

It is equally important to remember, also, that, with the progress of time, a school or college, without support, like any other growth, will wither away and die, and that if the West Virginia University is to grow it must have abundant support in the way of appropriations from the State; not extravagant appropriations, not niggardly appropriations, but appropriations commensurate with the importance and amount of the work to be done.

It is not enough, however, that appropriations be liberal. They must be certain, and not subject to variations as the personnel of the legislature varies. Ever since it was established the University has been crippled almost as much by the uncertainty as by the absence of funds; for without any assurance of liberal support for more than two years in advance it was not practicable to formulate plans, which, in the event of failure by the legislature to make sufficient appropriations, would have to be abandoned before they were fairly matured. Neither is it the business of a university president to spend weeks of time, that should be otherwise occupied, in lobbying for appropriations, as has been necessary in this State ever since the University was established. Other states have had a similar experience and have learned after many years that the only satisfactory way to avoid this uncertainty of adequate support and to obviate the necessity of lobbying and "log-rolling" to get but a modicum of what the State should pay willingly and freely, is to lay a direct or millage tax on all real and personal property for the support and maintenance of the University. In Michigan, in addition to a large income from certain specific sources, there is a tax of one-sixth of a mill for the support of the university. President Angell, of that institution, in his report for 1893, says with reference to this tax: "The bestowal of aid in this way gives us ground to hope that we can surely depend on it for an indefinite period in the

future. It promises stability in the support of the institution so that we can with reasonable safety plan for the future”.

The total valuation of all property, including railroads, in the State for 1897, was in round numbers \$225,000,000. A tax of three-twentieths of a mill on each dollar, or of one and one-half cents on each hundred dollars of this amount would produce a revenue equal to the amount appropriated for the support of the University for the past year. But with the largely increased number of students, the appropriation for the current year should be at least double that of last year, or three-tenths of a mill on each dollar.

The courses of study referred to above now include Classical, Scientific, Philosophical, Modern Literature, Premedical, Civil Engineering, Mechanical Engineering, Manual Training, Agricultural, and Law. All of these with the exception of the Premedical, Electrical Engineering, and Manual Training lead to the regular degrees given in the respective courses. In addition to these regular courses of study, courses in Music, Art, and Library Science also are given.

The faculty as now constituted is as follows:

THE FACULTY

Jerome Hall Raymond, Ph. D., President of the University, and Professor of Economics and Sociology.

Robert Allen Armstrong, A. M., Vice President of the University, and Professor of English Literature.

Powell Benton Reynolds, D. D., Chaplain of the University, and Professor of Philosophy.

Okey Johnson, LL. B., A. M., Dean of the College of Law, and Professor of Constitutional and International Law and the Law of Corporations.

Thomas Clark Atkeson, Ph. D., Dean of the College of Agriculture, and Professor of Agriculture.

Charles Alfred Ellenberger, Director of the School of Music, and Professor of Music.

St. George Tucker Brooke, LL. D., Professor of Common and Statute Law.

William P. Willey, A. M., Professor of Equity, Jurisprudence and Commercial Law.

- Alexander Reid Whitehill, Ph. D., Professor of Chemistry.
- James William Hartigan, A. M., M. D., Professor of Biology.
- John Lindsay Johnson, C. E., Professor of Civil and Mining Engineering.
- Samuel B. Brown, A. M., Professor of Geology and Minerology.
- William Sleeper Aldrich, M. E., Professor of Mechanical Engineering.
- Thomas Condit Miller, A. M., Professor of Pedagogy, and Principal of the Preparatory School.
- James Scott Stewart, M. S., Professor of Mathematics.
- Robert William Douthat, Ph. D., Professor of the Latin Language and Literature.
- Lee Cleveland Corbett, M. S., Professor of Horticulture and Forestry, and Horticulturalist of the West Virginia Agricultural Experiment Station.
- Bert Holmes Hite, M. S., Professor of Agricultural Chemistry, and Chemist of the West Virginia Agricultural Experiment Station.
- Thomas Edward Hodges, A. M., Professor of Physics.
- Andrew Delmar Hopkins, Ph. D., Professor of Economic Entomology, and Vice-Director and Entomologist of the West Virginia Agricultural Experiment Station.
- Frederick Lincoln Emory, B. S., M. M. E., Professor of Mechanics and Applied Mathematics.
- Lewis Cass Woolery, A. M., Professor of the Greek Language and Literature.
- John Alexander Lockwood, M. S., 1st Lieutenant, 4th Cavalry, U. S. A., Professor of Military Science and Tactics.
- Alfred Jarrett Hare, A. B., Professor of the Latin Language and Literature.
- Frederic William Sanders, Ph. D., Assistant Professor of European History.
- Frederick Wilson Truscott, Ph. D., Assistant Professor of Germanic Languages and Literatures.
- Kenneth McKenzie, Ph. D., Assistant Professor of Romance Languages and Literatures.
- William Earl Rumsey, B. S. Agr., Instructor in Botany, and Botanist and Assistant Entomologist of the West Virginia Agricultural Experiment Station.

Dennis Martin Willis, Instructor in Book-keeping and Commercial Practice, and Principal of the Commercial School.

Richard Ellsworth Fast, LL. B., Instructor in American History, and Political Science.

Charles Henry Patterson, A. M., Instructor in Elocution and Public Speaking.

Eliza Jane Skinner, Library Director, and Instructor in Library Science.

Eva Emma Hubbard, Instructor in Drawing and Painting.

Russell McMurphy, Instructor on the Piano.

Frank William Keene, Instructor on Stringed Instruments.

Clement Ross Jones, M. E., Instructor in Mechanical Engineering.

Russell Love Morris, B. S. C. E., Instructor in Civil and Mining Engineering.

Daniel Jenifer Barton, Assistant in Mathematics.

Benjamin Graeff Printz, Director of the Gymnasium.

Rufus West, Assistant in Mechanical Engineering.

Elizabeth Lee Whitescarver, Assistant in Shorthand and Typewriting.

Grace Martin, B. M., Assistant on the Piano.

UNIFORM EXAMINATIONS

Uniform examinations have been discussed during the last two years at almost every institute in the State, and the teachers have expressed themselves almost unanimously in favor of a change from the present unsatisfactory method of licensing teachers to one that will embrace the whole State and will place all the teachers on the same basis and at the same time will give the holder of a certificate perfect freedom in choosing the place or county in which to teach without the trouble and expense of more than one examination.

As the present system of examinations is discussed at some length in another part of this report, it is not necessary to compare here the relative merits of the system. Indeed, it is hardly necessary to make an argument in favor of a change when the demand for that change by those most interested is practically unanimous. But as definite information is not always available to those interested in the subject, it seems advisable to give here something of the workings of the system in other states as given in the reports of the State Superintendents. It would be possible to give in this connection page after page, but much of it would be practically useless because of the difference of the conditions prevailing in West Virginia and those in other states. Such states therefore, have been chosen as have, in some respects at last, conditions similar to those in this State or else have made such rapid strides since the adoption of uniform examinations that they are striking examples of the success of that system.

The system of uniform examinations may be found in two different forms, of which that in New York and that in Virginia are very good examples. In New York the law is silent on the subject of uniform examinations but gives the State Superintendent of Public Instruction authority to provide examination and certification of teachers. Under this statute, which a prominent educator of New York says has done more to advance the cause of education than any five other laws, the State Superintendent has made full provision for examinations which are in the care and under the control of certain commissioners who prepare questions, determine the time and place of examinations, grade manuscripts and issue certificates good in any county in the State. The following are the regulations pertaining to examinations in that State.

REGULATIONS

Certificates

Teachers' certificates issued by school commissioners shall be of three grades—first, second and third; a training class certificate, and special certificates to be known as drawing, kindergarten, and vocal music certificates.

First Grade

Term.—Certificates of this grade shall be issued for a term of five years.

Renewals.—Upon their expiration, from time to time, certificates held by teachers who have taught under them successfully for periods of three, four or five legal school years, may be renewed by any school commissioner in the State, for corresponding periods, without examination. These certificates hereafter renewed by school commissioners shall be made valid so that they shall expire on July 31st, or at the end of some school year.

Upon their expiration, from time to time, certificates held by teachers who have taught under them successfully for less than three legal school years, may be renewed by any school commissioner in the State, upon the approval of the State Superintendent of Public Instruction, but such renewals shall be for a period of three years or less, as the Superintendent shall determine.

Experience.—Candidates must have taught successfully for at least two years, and are not eligible to enter an examination without having had such experience.

Educational requirements.—Candidates shall be required to pass a written examination in the following subjects: Algebra,

American History, Arithmetic, Book-keeping, Civil Government, Composition, Current Topics, Drawing, Geography, Grammar, Methods and School Economy, Orthography, Penmanship, Physics (Elementary), Physiology and Hygiene, and School Law.

Standing required.—For certificates of this grade, separate examinations shall be held, and candidates must attain a standing of at least 75 per cent. in Arithmetic, Geography, Grammar, Penmanship, Methods and School Economy, and Orthography, and an average standing of at least 75 per cent. in the other subjects.

Times for holding Examinations.—Examinations shall begin on the first Thursday in March and the second Thursday of August, and shall continue two days.

Number of trials allowed.—All candidates who attain the required percentage in any one of the designated subjects, but not in all, will be credited for those studies in which they shall have passed, and a partial certificate to this effect will be given by the school commissioner. Candidates passing the required percentages in the remaining designated subjects, at either or both of the next two subsequent examinations, will receive a certificate.

Examination of answer papers.—All answer papers submitted by candidates for first grade certificates shall be forwarded, immediately after the close of the examination, to the State Superintendent of Public Instruction, for examination, marking and filing, unless otherwise directed by the Superintendent.

Date of certificate.—All first grade certificates shall hereafter be issued on August 1st of each year. Certificates of this grade which are earned in the examinations of August, shall be dated and issued August 1st of the year in which they were earned, and all certificates of this grade which are earned in the March examinations shall be issued and dated on the first day of August following.

Second Grade

Term.—All second grade certificates issued between August 1, 1896, and July 31, 1897, shall be issued so as to expire July 31, 1899. After August 1, 1897, certificates of this grade shall be issued for a term of three years.

Renewals.—Certificates shall be renewed only upon re-examination, upon which new certificates shall be issued.

Experience.—Candidates must have taught successfully for a period of not less than ten weeks, and are not eligible to enter an examination without having had such experience.

Attendance upon a training class, under the supervision of

the Department of Public Instruction, for one year, will be accepted in lieu of such experience.

Educational requirements.—Candidates shall be required to pass an oral examination in Reading and a written examination in the following subjects: American History, Arithmetic, Civil Government, School Law, Composition, Current Topics, Drawing, Geography, Grammar, Methods and School Economy, Orthography, Penmanship, and Physiology and Hygiene.

Standing required.—Candidates must attain a standing of at least 75 per cent. in Arithmetic, Geography, Grammar, Penmanship, Methods and School Economy, Orthography and Reading and an average standing of at least 75 per cent. in the other subjects.

Day for holding examinations.—Examinations for certificates of this grade, unless omitted in the discretion of the school commissioner, shall begin on the second Thursday each of January and August, the first Thursday each of March and June, and the fourth Friday each of April and September, and shall continue two days.

Number of trials allowed.—Candidates for their first certificate in this grade shall be exempt from examination in any subject in which they have attained the required percentage in any previous examination held not more than six months before. For any subsequent certificate of this grade, candidates shall be exempt from examination in those subjects in which they shall have attained the required percentages, provided all such percentages shall have been attained in one or two examinations, held within six months preceding the date of the final examination.

After August 1, 1897, candidates for certificates of this grade will be permitted to combine the standing earned by them in any three examinations held in any school year.

Examination of answer papers.—All answer papers submitted by candidates for second grade certificates shall be forwarded, immediately after the close of the examination, to the State Superintendent of Public Instruction, for examination, marking and filing, unless otherwise directed by the Superintendent.

Date of certificate.—All second grade certificates issued between August 1, 1896, and July 31, 1897, shall be dated from the first day of the month in which the certificate is issued; thus a certificate issued any time in December, 1896, shall be dated December 1, 1896, and shall read on its face as follows: "And is hereby licensed to teach any common school in this commissioner district for a term of two and eight-twelfths years from this date."

After August 1, 1897, all second grade certificates granted

shall be issued August 1st of each year, which is the first day of each school year.

Third Grade

Term.—Certificates of this grade shall be issued for a term of one year, and shall be limited to a particular school or grade.

Number of certificates.—But one certificate of this grade shall be granted to the same person.

Experience.—None is required.

Educational requirements.—Candidates shall be required to pass an oral examination in Reading and a written examination in Arithmetic, Composition, Geography, Grammar, Orthography, Penmanship, Physiology and Hygiene, American History and School Law.

Standing required.—Candidates for certificates of this grade must attain a standing of at least 75 per cent. in Arithmetic, Geography, Grammar, Orthography, Penmanship and Reading, and an average standing of at least 75 per cent. in the other subjects.

Days for holding examinations.—Examinations for certificates of this grade, unless omitted in the discretion of the school commissioner, shall be held on the several dates arranged for second grade examinations.

Number of trials allowed.—Candidates for certificates in this grade shall be exempt from examination in any subject in which they have attained a standing of 75 per cent. or over in any previous examination held not more than six months before. After August 1, 1897, candidates for a certificate of this kind will be permitted to combine the standing earned by them in any four examinations held within any school year or between August 1st of any year and the 31st day of July following.

Examination of answer papers.—All answer papers submitted by candidates for third grade certificates shall be forwarded, immediately after the close of the examination, to the State Superintendent of Public Instruction, for examination, marking and filing, unless otherwise directed by the Superintendent.

Date of certificate.—A candidate may take the examination at any appointed time or place, but a certificate shall be issued only after the candidate shall have made an engagement to teach approved by the school commissioner.

All certificates of this grade which are issued between May 15, 1896, and January 1, 1897, shall be issued so that they shall expire July 31, 1897.

All certificates of this grade issued between January 1, 1897, and August 1, 1897, shall be issued so that they shall expire July 31, 1898.

General Regulations

1. Candidates undertaking the first grade examination and failing to attain the standing required for certificate of that grade may be given a certificate of the second or third grade, provided the percentages attained are as high as those required in the grade for which the certificate is granted, but no credits obtained in a second or third grade examination shall be allowed in an examination for a first grade certificate.

2. Candidates for certificates of any grade shall be exempt from examination in any subject in which they have attained a standing of 70 per cent. in an examination for a State certificate, as shown by any Partial State Certificate issued not more than five years previously.

3. No answer paper, in any subject, showing a standing of less than 50 per cent. shall be accepted.

4. School commissioners may, in their discretion, supplement these examinations with additional questions, demand a higher percentage than is required by the standard regulations, and, for sufficient reasons, refuse to admit a candidate to the examination, or to grant him a certificate after he has attained the required standing.

5. If, after passing an examination, a candidate desires to teach within the jurisdiction of a commissioner other than the one under whose direction such candidate was examined, the standing attained by such candidate, as marked by the Department, shall be transferred by the commissioner under whose direction such candidate was examined to the commissioner under whose jurisdiction such candidate is to teach, upon his requisition, or upon the request of the candidate. Commissioners must not accept pass-cards from candidates.

Marking

6. The standing in each subject will be marked as directed on the question paper. Any answer or process that shows knowledge of principles, or gives an essential part of the information required, shall be given its proportion of credit.

7. Penmanship will be judged from the papers on Geography, and a certificate will be refused the candidate whose penmanship is not clearly legible.

8. In the solution of problems, every process must be given in full or indicated. Answers alone will not be accepted.

9. In marking partial certificates of the first grade, commissioners will draw a line through all subjects not taken, also through all standings below 75 per cent. in Arithmetic, Geography, Grammar, Penmanship and Methods and School Economy, and all standings below 50 per cent. in the remaining subjects.

Indorsement of Certificates

10. A school commissioner shall indorse for the full period for which they are valid when presented to him for indorsement, first and second grade certificates, training class certificates and drawing, music, and kindergarten certificates by any other school commissioner in the State, or issued by the authorities of any city which has adopted and is working under the uniform system of examinations, unless a valid reason exists for withholding such indorsement. Such certificates, when properly indorsed, shall be valid in the school commissioner district over which the school commissioner who indorsed them has jurisdiction.

Records of Examinations

11. Records of all examinations shall be kept by school commissioners, in a book furnished by the Department of Public Instruction for that purpose.

Certificates

12. Blank certificates of the prescribed form will be furnished for the use of the commissioners by the Department of Public Instruction.

Places of Examinations

13. Commissioners shall give due notice of the places of examinations and the hour at which they will begin.

14. The places for holding examinations should be those best suited to the convenience of the entire district, and a yearly schedule of such places, with the date of each examination, shall be published by the school commissioners.

15. Examinations shall be held at but one place in any school commissioner district upon the same date, unless permitted by the State Superintendent of Public Instruction.

16. After August 1, 1897, if any school commissioner shall establish to the satisfaction of this Department that the conditions in his district require him to issue a certificate upon some other date than August 1st, he will, in the discretion of the State Superintendent, be given the privilege of issuing such certificate, but such certificate shall be issued for the remaining period for which it would have been valid had it been issued on the 1st day of August, preceding the date on which permission is given to issue such certificate.

Statement of Candidates

17. Before entering upon examination, candidates will be required to fill out a copy of the following:

that of school buildings. In no case shall candidates be seated at tables, and in school rooms they must be seated so that there shall be least opportunity possible to copy from the papers of other candidates. Wherever possible, candidates shall be seated so that an empty desk shall intervene between every two candidates. In no case shall two candidates be seated to sit at the same desk. If candidates cannot be seated in one room, additional rooms must be used, and competent persons employed to supervise the work.

No candidate shall enter an examination more than one time after such examination has convened, and no candidate shall leave the room within one hour after the question papers have been distributed in such examination.

Communication of any character shall not be permitted between candidates taking an examination; and any person detected in copying the papers of another candidate, or endeavoring to obtain aid in any way, or who gives aid to another candidate in any way, must be immediately dismissed from the examination.

Candidates must not be permitted to take books, notes or papers to the seats occupied by them in an examination.

All answer papers must be submitted by candidates on the half-day designated in the program. Papers submitted contrary to this provision will not be accepted at this Department.

Candidates whose papers are rejected for collusion will be deferred from entering future examinations until permission for re-examination is granted them by this Department.

Persons who are not taking examinations must not under any circumstances be permitted to occupy seats among those being examined.

Examiners should read to candidates at the opening of each examination rules 2, 5, 6 and 9, under which examinations must be conducted.

In Virginia the uniform examinations are somewhat modified, in that the only duty of the commission, which in this case is the State Board of Education, is to prepare the questions which are used in all the counties of the State. The county superintendent of schools conducts the examination, grades the manuscripts, and issues certificates, which are valid only in the county in which issued. The same system is in use in North Dakota, but, as in Virginia, is not entirely satisfactory. State Superintendent Emma F. Bates, in her report for 1896 says:

"The questions upon which first, second and third grade teachers pass are the same for all the teachers of the State. But the

examination papers are marked by thirty-nine county superintendents, and it follows that there will be a consequent diversity in the markings and percentages. Then, too, certificates are valid only for the county in which issued. A certain proportion of time of the county superintendent is consumed in examining and marking these papers, which would much better be spent in the inspection of the work done by the teachers. In a few of the largest counties this work has already become a drudgery, and loss of time detrimental to successful effort by the county superintendent, in the more important work of this office—that of visiting schools.

There are many reasons why these papers should all be marked by a central board. There would be less opportunity for favoritism, less possibility to bring undue political or personal influence to bear upon the county superintendent to cause him to license incompetent teachers. The markings would be upon the merits of the papers presented and therefore just. A certificate would be valid in any county, and thereby save teachers who pass from one county to another to teach, unnecessary expense and labor.

I therefore recommend that the Legislature empower the Department of Public Instruction to appoint such board, and to further make a needed appropriation to compensate such board for their services."

No attempt has been made to advance an argument in favor of uniform examinations, for, as remarked above, none is necessary. The extract from the regulations governing examinations in New York shows, in a way, what would be necessary in West Virginia. The comment from the report of the State Superintendent of North Dakota shows that the modified system is not en-

tirely satisfactory, neither would it be a panacea for the ills of the school system of the State. But if either would bring about honest examinations and better schools the welfare of the State demands a change from the present unsatisfactory method of certifying teachers.

REPORTS OF COUNTY SUPERINTENDENTS

The following tables contain the most important statistics of each county in the State for the two years covered by this report. The tables for each county placed together for convenience of comparison show, in most cases, a very healthy growth in educational affairs and careful methods in transacting the business. Unfortunately several county superintendents were so late in sending in their annual reports that it is not possible now to give here the written reports from each county. Though they are not absolutely necessary, they are important and will not be omitted in the future.
